2 The Tyranid Swarm

The Tyranids travel through the intergalactic void in vast Hive Fleets. These fleets consist of millions of living ships, each carrying thousands of creatures spawned within breeding chambers whose walls are coated in organic mucus. All these creatures are connected to the immense entity that is their ship, which in turn exists only to serve the Hive Fleet as a whole. The Tyranids therefore possess a collective intelligence that allows them to act and perceive their surroundings as a single being, granting them complete control over every component of the Hive Fleet.

From the tentacled monstrosities that are the Tyranid ships to the smallest protozoan, every creature is subject to the relentless will of the Hive Mind. Giving each of these organisms a sufficiently developed brain to act independently would be a waste of biological resources. The smallest creatures are therefore controlled by organisms created specifically for this purpose.

They function in perfect symbiosis, coordinated through psychic commands transmitted naturally from one creature to another. At the cost of many lives, it has been discovered that when the influence of a higher Tyranid organism is removed, the creatures dependent upon it tend to revert to instinctive behaviour. For this reason, neither the Hive Fleets nor their swarms possess a commander-in-chief in the conventional sense. Instead, commands and information are transmitted through complex psychic connections.

All Tyranid organisms capable of relaying the Hive Mind's commands are powerful Psykers. They communicate with their kind not through language, but by means of an innate form of telepathy. That such a concentration of Psykers can exist without drawing the Daemons of Chaos into the material universe is evidence either of the immense power of the Tyranids' psychic abilities or, more simply, of the creatures' lack of souls.

The Tyranids do not manufacture their weapons and ships from metal or plastic. Instead, they use genetic manipulation and bio-construction, employing biological materials harvested from the worlds they have consumed. Every gland, bio-weapon, and projectile is a Tyranid organism in its own right, from the spores that contaminate a planet's atmosphere to the twisted spires that rise into the sky and announce the presence of the Tyranids upon a world.

To face the Tyranids is to confront a race encompassing everything from the microscopic to the colossal, every organism presenting a deadly threat.

The space-dwelling Norn Queens and the formidable Dominatrices are among the most highly evolved Tyranid organisms. They give birth to endless hordes of creatures, vessels, and organic weapons. In battle, the Tyranids overwhelm their enemies beneath an avalanche of claws and fangs. Their destructive potential is enormous, but the physical threat is only one aspect of the danger they pose to the other races.

A Tyranid invasion is a terrifying spectacle, and it is not uncommon for defenders to take their own lives or descend into madness upon witnessing the scale of the carnage. When the invasion begins, the sky takes on a reddish hue as the atmosphere becomes saturated with poisonous spores. It then darkens as the first winged organisms launch their attack, spreading terror and confusion.

Genestealers emerge from hiding and assault enemy command posts while Lictors prepare ambushes. They then consume the brains of their victims, passing information concerning the enemy's strengths and weaknesses to the rest of the swarm.

Thousands of Mycetic Spores fall from the sky and split open upon impact like overripe fruit, releasing swarms of creatures amid torrents of viscous fluid. These creatures rapidly gather into an unstoppable tide, and within a matter of days the entire surface of the planet is covered by Tyranid organisms of every imaginable size and form.

The Tyranids' microscopic spores establish themselves so effectively that even the native plant life is irreversibly altered before being consumed. They germinate rapidly, allowing the Hive Fleet to absorb the planet's biomass once all resistance has been defeated.

During the final stages of the invasion, swarms of Rippers consume everything in their path before plunging their bloated bodies into the acidic fluids of the digestion pools. Once broken down, the biomass is transferred to the ships of the Hive Fleet through Capillary Towers. Upon reaching the interior of the vessels, it is reshaped to create new organisms. In this way, the bodies of the planet's defenders, along with its native fauna and flora, are recycled.

Even before an invasion begins, the defenders must contend with despair. Hive Fleets generate a psychic presence known as the Shadow in the Warp, which makes astropathic communication—and therefore any attempt to call for assistance—impossible. The Hive Fleet thus isolates every world in its path before consuming it.

Relentless and inexorable, the Tyranid race represents the greatest threat that Humanity and the other races of the galaxy have ever faced.

The Tyranids are not native to this galaxy. They travelled through the interstellar void for millennia, crossing these dark expanses for centuries before reaching the edge of the *Segmentae Majoris*.

No one knows whether they began this perilous journey because they had already consumed all life in their galaxy of origin or because they were fleeing an enemy even more formidable than themselves. It is possible that they have

fed upon planets since time immemorial and that this galaxy is merely the latest to suffer their depredations.

Whatever the truth, they must have expended unimaginable quantities of energy and demonstrated an inconceivable determination to survive such an arduous journey. During their voyages of thousands of years through the void, they entered a state resembling hibernation.

Now they have awakened, and they are hungry. The survival of every living creature is at risk.

3 Special Rules

3.1 Army Creation

Tyranids select their troops differently from other armies and do not follow the standard army-building rules. Instead, detachments of Synapse creatures generate Command Points, while other formations consume them.

Before another Synapse Formation may be selected, all Command Points generated by the previously selected Synapse Formations must have been spent.

Tyranid Titans are relatively rare. The army may include no more than one Tyranid Titan for every 5 Command Points generated.

3.2 Morale

Tyranids are not affected by morale in the same manner as other armies and never make Morale Tests.

Their Morale value instead represents their connection to the Hive Mind. When a Tyranid detachment becomes Broken, it must make a Hive Mind Test. This test is resolved in the same manner as a Morale Test.

If the test is failed, the detachment follows its Instinct, as described by its *Slave* ability, and receives an Instinct counter. If the test is passed, there are no further consequences.

A detachment activated while it has an Instinct counter automatically removes the counter after completing its activation.

A detachment with an Instinct counter suffers a -1 AF penalty to represent its disorganisation.

3.3 Adaptations

Tyranids excel at adapting to their opponents. To represent this, after seeing the opposing player's army list but before the battle begins, the Tyranid player selects adaptations.

Every Tyranid army has 10 points to spend on adaptations from the following list:

Bio-Acid (7 points): For every complete 2,000 points in the army, one attack die from one weapon may gain *Damage (+1)* and improve its AP by 1. The use of this effect must be declared before making the To-Hit roll.

Bio-Targeting (7 points): Every unit in the army may reroll results of 1 on its ranged To-Hit rolls.

Endless Swarm (7 points): During the End-of-Turn Effects step, each Hormagaunt, Gargoyle, Ripper, Termagant, or Barbgaunt detachment recovers 1D3 previously lost bases.

The recovered bases must be placed in coherency with their detachment and outside all enemy zones of control.

Velocity (7 points): Increase the total movement of every base in the army by 5 cm. Apply this bonus after doubling or tripling the base's movement according to its order.

Camouflage (5 points): Class 1 and 2 bases gain a 10 cm Infiltration move. If they already possess an Infiltration move, increase it by 10 cm.

Carapace (5 points): For every complete 1,000 points in the army, the controlling player may reroll one saving throw per turn. This effect may only be used once per detachment during a given turn.

Assault Expert (5 points): Every base in the army may reroll results of 1 on its assault dice.

Psychic Scream (5 points): Every enemy detachment with at least one base within a Synapse radius suffers a -1 penalty to its Morale value.

Shadow in the Warp (4 points): Before deployment, for every complete 2,000 points in the army, one Synapse creature may be given the *Dread* (-1) ability.

Acidic Entrails (3 points): If a Tyranid base loses an assault duel after rolling at least one double on its assault dice, it inflicts one AP 0 hit against the base that defeated it.

Overwhelming Swarm (3 points): Each outnumbering bonus adds 1D6+1 to AF instead of 1D6.

Subterranean Surge (2 points): When entering the battlefield, a Trygon may bring two Hormagaunt swarms with it instead of one.

Enhanced Synaptic Link (2 points): Increase the Hive Mind radius of every Synapse creature by 10 cm.

Synaptic Nodes (2 points): For every complete 3,000 points in the army, the *Slave* ability of one detachment may be replaced with *Synapse (10 cm)*.

Bio-Synaptic Instinct (1 point): For every complete 2,000 points in the army, the *Slave* ability of one detachment may be replaced with *Semi-Synaptic*.

The Semi-Synaptic creature retains the same Instinct as the original creature.

Adrenaline Surge (1 point): For every complete 2,000 points in the army, increase the AF of one detachment by 1.

4 Special Abilities

4.1 Synaptic Overload

Once per turn, a base with this ability may cause a detachment within its Synapse radius to automatically pass a Hive Mind Test.

The use of this ability must be declared before making the test.

4.2 Bio-Toxin

Weapons with this ability cannot inflict damage upon allied Tyranid bases.

4.3 Subterranean Assault

When a Trygon uses its *Deep Strike* ability to enter the battlefield, one Hormagaunt swarm may emerge with it.

Place the Hormagaunt detachment within 6 cm of the Trygon's arrival point. Both detachments are placed on the battlefield simultaneously.

4.4 Spore Pods

Spore Pods release clouds of toxic particles around the Bio-Titan. A Bio-Titan may purchase no more than one Spore Pod.

During the Combat Phase, every base within 15 cm of the centre of the Bio-Titan is hit:

- On a 4+ if the Bio-Titan has an Advance or First Fire order.
- On a 5+ if the Bio-Titan has a Charge or Forced March order.

Spore Pods have AP 0 and possess the *Reduces Cover (3)* and *Bio-Toxin* abilities.

Spore Pods function even if the Bio-Titan is pinned in an assault. In this case, resolve the Spore Pod attacks before resolving the assault. Any damage inflicted counts towards the assault's combat result.

Spore Pods do not suffer a To-Hit penalty when the Bio-Titan is engaged in an assault.

4.5 Slave (Instinct)

Slave detachments follow their Instinct order if either of the following applies:

- They are outside the Hive Mind radius of a Synapse base during the Orders step.
- They have failed a Hive Mind Test.

All movement required by an Instinct order is performed normally during the Movement Phase.

4.5.1 Hunt

During the Movement Phase, a detachment with this Instinct moves up to its normal Movement characteristic towards the closest enemy detachment that is not already engaged in an assault. If it makes contact, it engages that detachment in an assault.

If the detachment is not engaged in an assault, it must shoot at the closest valid enemy detachment during the Combat Phase.

4.5.2 Devastation

During the Movement Phase, a detachment with this Instinct must move up to twice its normal Movement characteristic towards the closest enemy detachment.

If the closest enemy detachment is already engaged in an assault, the Tyranid detachment may instead move towards the second-closest enemy detachment.

If it makes contact with an enemy, it engages that enemy in an assault. A detachment following the Devastation Instinct never makes ranged attacks.

4.5.3 Nest

A detachment with this Instinct does not move. During the Combat Phase, it must shoot at the closest visible enemy detachment.

This is not a First Fire order. The detachment therefore cannot:

- Perform Overwatch Fire.
- Reroll results of 1 on its To-Hit rolls.
- Perform Indirect Fire.

The detachment must shoot at an enemy even if that enemy is engaged in an assault.

If a detachment following an Instinct order uses a template weapon, centre the template over the closest enemy base.

4.6 Semi-Synaptic (Instinct)

Detachments with this ability may receive orders normally, even while outside a Synapse radius.

If they fail a Hive Mind Test, they act as Slave creatures and follow their listed Instinct.

4.7 Synapse (X cm)

Detachments with this ability receive orders normally.

They may also control Slave detachments if at least one base from the Slave detachment is within X cm of a Synapse base.

Detachments arriving through the *Tunneller* or *Mycetic Spore* rules may receive an order if they are within the Synapse radius of a base when they arrive.

The Synapse radius functions even if the Synapse base or the Slave bases are inside transports.

A Synapse base attached to a detachment grants the Synapse ability to the entire detachment.

A detachment following an Instinct order loses its Synapse ability.

4.8 Spore Mine

When an attack is made with a Spore Mine weapon, it creates a hazardous area in addition to resolving the normal effects of the attack.

Leave the template in the position where the attack was resolved. It remains in play for the turn in which it was fired and for the following turn, after which it is removed.

The area counts as *Dangerous Terrain* (4+/AP 0) with the *Bio-Toxin* ability.

The Spore Mine area may be targeted by shooting attacks. Each successful hit removes one Spore Mine from the area.

4.9 Mycetic Spore

Mycetic Spores follow these rules:

- Spores are divided into groups. Each group consists of one or more detachments that purchased Mycetic Spores.
- During Off-Table Arrivals, determine the group's arrival point in the same manner as another off-table arrival. Mycetic Spores are not affected by the *Limited Assault* rule.
- The Spores enter during the Movement Phase and may be targeted by Overwatch Fire. For range and line-of-sight purposes, they are considered to be at altitude directly above their arrival point.
- Make one saving throw for each successful hit and remove destroyed Spores randomly. Troops transported inside Spores destroyed either in flight or on the ground cannot make Emergency Exit Tests.
- Place all surviving Spores in coherency and within 12 cm of the arrival point. A Spore cannot be placed on an enemy base or within Impassable terrain.
- The transported troops then disembark according to the normal Transport rules.

- As soon as a Spore is empty, it is removed and considered destroyed. Empty Spores have no zones of control and cannot contest or secure objectives.
- Each Mycetic Spore may transport one Class 1 or 2 base.

5 Psychic Powers

5.1 Norn Queen

5.1.1 Bio-Resistance

[**Movement Phase, upon activation**]: The Norn Queen improves its Regeneration by 1 and gains **Dodge (5+)** for the remainder of the turn.

5.1.2 Psychic Scream

[**Movement Phase, upon activation**]: The Norn Queen gains the **Dread (-1)** and **Psychic Abomination** abilities for the remainder of the turn.

5.1.3 Psychic Projectile

[**Combat Phase, Shooting**]: Choose a target within 45 cm and in the Norn Queen's Line of Sight. The target is hit on a 4+. This is a **Psychic Power**.

5.2 Dominatrix

5.2.1 Warp Field

[**Movement Phase, upon activation**]: The Dominatrix gains **Protection (4+)** for the remainder of the turn.

5.2.2 Energy Torrent

[**Combat Phase, Shooting**]: The Dominatrix focuses its psychic energy to destroy the enemy. Choose one of the two firing modes when it is activated.

Energy Torrent – Focused	90 cm	1	3+	-4	1D3 Hits
Energy Torrent – Diffuse	90 cm	Template	3+	-1	Template (7.5 cm), Reduces Cover (-1)

5.2.3 Synaptic Beacon

[**Movement Phase, upon activation**]: The Dominatrix extends the range of its Synapse Radius to 60 cm for the remainder of the turn. In addition, during the End-of-Turn Effects, detachments acting on Instinct within 60 cm may attempt a Hive Mind test. If successful, remove their Instinct tokens.

6 Unit Profiles

Name	Movemen	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP	Weapon Abilities
Infantry (1)										
Barbeaunt	10 cm	–	+0	6	Barbed Cannon	45 cm	1	4+	0	–

7.1 Weapon Costs

Weapon	Cost
Bio-Cannon	75
Spore Pods	50
Bile Spitter	75
Spine Clusters	75
Pyro-Acid Jet	50
Razor Claws	75
Dart Salvo	75
Tentacles	50

8 Hit Location Charts

8.1 Alpha Hierodule / Hierophant Titan

D6	Front/Rear Location
1-2	Legs
3	Weapon
4	Head (front) / Abdomen (rear)
5	Abdomen
6	Player's choice

8.2 Damage Effects

Body	
1	1 additional point of damage
2	1 additional point of damage; reduce Regeneration by 1
3+	2 additional points of damage
Weapon	
1	Weapon damaged (Repair on 4+)
2	Weapon destroyed
3+	Damage to the Body
Leg	
1	–
2	Reduce the Titan's base Movement by 5 cm (Repair on 4+). From this damage onward, the Titan falls if it is destroyed.
3	Reduce the Titan's base Movement by an additional 5 cm (Repair on 4+)
4	Immobilised; 1 additional point of damage
5+	Damage to the Body

Head	
1	–1D6 to AF (Repair on 4+)
2	May only receive an Order on a 4+ (Repair on 4+); 1 additional point of damage
3+	Damage to the Body
Abdomen	
1	–1 AF; lose 1D3 transported bases
2	–1 AF; 1 additional point of damage; lose 1D3 transported bases
3+	–1 AF; damage to the Body; reduce Regeneration by 1; lose all transported bases

9 Army Formations

Synapse Formations	Contents	Command Points	Cost
Dominatrix Detachment <i>(Limit: one per 3,000 points)</i>	1 Dominatrix base	6	400
Alpha Genestealer <i>(May only be attached to Genestealers)</i>	1 Alpha Genestealer base	1	+50
Tyranid Warrior Detachment	4 Tyranid Warrior bases	3	225
Harridan Detachment	1 Harridan base	1	225
Neurotyrant Detachment	3 Neurotyrant bases	1	175
Winged Hive Tyrant Detachment	3 Winged Hive Tyrant bases	3	250
Hive Tyrant Detachment	3 Hive Tyrant bases	3	250
Norn Queen Detachment	1 Norn Queen base	3	275
Trygon Detachment	1 Trygon base	1	200

Slave Formations	Contents	Command Points	Cost
<i>Infantry</i>			
Barbgaunt Detachment	5 Barbgaunt bases	−1	100
Hive Guard Detachment	5 Hive Guard bases	−1	200
Gargoyle Detachment	5 Gargoyle bases	−1	125
Genestealer Detachment	5 Genestealer bases	−1	200
Hormagaunt Detachment	5 Hormagaunt bases	−1	100
Lictor Detachment	5 Lictor bases	−1	225
Termagant Detachment	10 Termagant bases	−1	150
Ripper Detachment	10 Ripper bases	−1	100
<i>Cavalry</i>			
Ravener Detachment	5 Ravener bases	−1	200
<i>Walkers</i>			
Carnifex Detachment	3 Carnifex bases	−1	175
Venomthrope Detachment	3 Venomthrope bases	−1	100

10 Infantry

10.1 Barbgaunt

Barbgaunts are little more than living weapons, their bodies and bio-cannons enslaved to the will of a throbbing symbiotic ganglion. They fire volleys of chitinous barbs that erupt through violent muscular spasms, impaling nearby victims in a hail of razor-sharp projectiles.

They have the **Slave (Nest)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
10 cm	–	+0	6	Barbed Cannon	45 cm	1	4+	0

10.2 Hive Guard

During the final stages of a Tyranid invasion, strange alien structures appear upon the surface of the prey world. Enormous spore chimneys erupt from the ravaged ground to belch their toxins into the air, while capillary towers rise to transmit a slurry of predigested biomass to the hive ships.

These structures are essential to the fulfilment of the Tyranids' objectives, and so the Hive Mind has created specialised bioforms dedicated to their protection: the Hive Guard. Stocky and heavily armoured, these organisms advance ponderously to form a phalanx before the enemy, bracing themselves before unleashing a devastating hail of projectiles from the massive bio-cannons fused to their arms. A deluge of vicious barbs tears through the enemy ranks, piercing armour and bone alike and raising a mist of blood.

They have the **Slave (Nest)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
10 cm	4+	+2	6	Impaler Cannon	45 cm	1	4+	–2

10.3 Gargoyles

Gargoyles form the first wave of Tyranids seen at the beginning of a battle. Their primary role is to spread terror and confusion throughout the enemy lines, throwing their prey into disarray and disrupting them as the rest of the swarm strikes.

A Tyranid attack is therefore often preceded by the beating of thousands of pairs of membranous wings as flights of Gargoyles descend upon the enemy, darkening the sky with their numbers and spitting death from their Flame Jets. The psychological impact of such an aerial assault is often enough to break the morale of ordinary combatants.

Unfortunately, fleeing is the worst possible choice for those facing a flying swarm of Gargoyles. These predators excel at isolating panicked targets before cutting them down with their biomorphs, or carrying them into the air and dropping them back to the ground with bone-shattering force.

Gargoyles have the **Infiltration**, **Jump Packs**, and **Slave (Hunt)** abilities. Their weapon has the **Reduces Cover** (–3) ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	–	+1	7	Flame Jet	20 cm	1	5+	0

10.4 Alpha Genestealer

The product of the Genestealers' constant evolution, Alpha Genestealers are the ultimate close-combat warriors. Terrifyingly strong and fast, their diamond-hard claws can tear through adamantium as if it were paper.

These organisms are generally deployed at the forefront of an attack, leading swarms of Genestealers to infiltrate enemy positions. Their role is to launch devastating attacks against those enemies that pose the greatest threat to the rest of the horde.

Genestealers are not only highly intelligent, but also possess a form of telepathy that allows them to act independently of the Hive Mind's directives.

The Alpha Genestealer has the **Synapse (15 cm)**, **Attached Character**, **HQ**, **Infiltration**, **Damage (+1) in Assault**, and **Elite (1)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	5+	+8	Attached	Claws and Pincers	–	–	–	–

10.5 Genestealers

The Tyranid Hive Fleets contain countless terrifying creatures, but one among them has earned a prominent place in the legends of hundreds of worlds. It is a stalker in the shadows, a clawed herald of death. It is known as the Genestealer, and it is one of the great scourges of the galaxy.

A swift and powerful predator, its claws can pierce even the strongest armour. Its broad, bulbous head contains an agile mind with remarkable powers of adaptation and a form of telepathy that allows it to act independently of the Hive Mind's directives. Thanks to this autonomy, it can destroy through cunning what brute force cannot overcome.

The Genestealers' powerful survival instinct continually drives them ahead of the Hive Fleets in search of spacecraft fleeing the surfaces of doomed prey worlds. A single Genestealer can easily conceal itself within a cargo hold, remaining hidden from the sight and hearing of the crew until the vessel reaches another planet. The arrival of just one Genestealer on a world can ultimately lead to the extinction of its entire population.

Genestealers have the **Semi-Synaptic (Devastation)**, **Infiltration**, and **Elite (1)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	–	+6	5	Claws and Pincers	–	–	–	–

10.6 Tyranid Warriors

Of all the species produced by the Hive Mind, Tyranid Warriors are among the most adaptable. They are creatures of nightmare: relentless killing machines with razor-sharp claws and black eyes gleaming with malevolent intelligence.

A Tyranid Warrior stands twice the height of a man, and its carapace is covered in impenetrable chitin. A creature so large and robust might be expected to move slowly, but a Tyranid Warrior strikes with the speed of a cracking whip.

Unlike most creatures controlled by the Hive Mind, Tyranid Warriors possess the intelligence required to use a wide variety of symbiotic weapons. They can therefore be encountered at every level of a Tyranid horde, fighting on the front line with boneswords and lash whips or providing supporting fire with Deathspitters and other heavy weapons.

Whatever its equipment, a Tyranid Warrior is a relentless opponent capable of identifying and exploiting its enemies' weaknesses with the insight of a born warrior. Worse still, its consciousness is intimately connected to the Hive Mind, whose knowledge it can draw upon whenever its own proves insufficient.

Tyranid Warriors have the **HQ**, **Regeneration (5+)**, **Synapse (20 cm)**, and **Elite (2)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
10 cm	4+	+5	–	Deathspitter	45 cm	1	4+	–1

10.7 Rippers

As soon as the Tyranids descend upon a planet, they release countless swarms of organisms whose purpose is to devour everything in their path. The most numerous of these feeder-beasts are known to the Adepts as *Minoris Omniphagem*, but are more commonly called Rippers by Imperial forces.

A Ripper Swarm is a mass of worm-like organisms driven by an endless appetite. These small creatures have serpentine bodies approximately half a metre long, terminating in broad heads above clusters of vestigial grasping claws.

Each head is split by an enormous mouth filled with rows of exceptionally sharp fangs and razor-edged bony ridges. A Ripper's powerful jaws can crush flesh and bone with alarming ease, and these creatures have even been known to gnaw through plasteel to reach food.

On the rare occasions when Rippers encounter obstacles they cannot overcome by consuming them, they burrow beneath them, their instincts guiding them towards their prey.

Rippers have the **Free Deployment** and **Slave (Devastation)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
10 cm	–	–1	6	Claws	–	–	–	–

10.8 Hormagaunts

The Hormagaunt is a highly specialised evolution of the Termagant and is extremely widespread throughout the Hive Fleets, which can deploy millions of these creatures.

A Hormagaunt possesses four razor-sharp claws designed to penetrate flesh and metal with equal ease. Its heavily muscled hind legs allow it to hurl itself towards its prey in a series of prodigious leaps.

Hormagaunts possess extraordinary tenacity and pursue their targets tirelessly, ignoring fatigue and injury until they have caught and slaughtered them with their scythe-like claws.

After bringing down its prey, the Hormagaunt rapidly begins to feed, tearing large pieces of flesh from the carcass with its fang-filled mouth. Such meals are quickly consumed, for the Hormagaunt's metabolism constantly drives it to seek new victims.

Hormagaunts have the **Slave (Devastation)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	–	+2	6	Claws	–	–	–	–

10.9 Lictor

The Lictor is a highly specialised evolution of the Tyranid Warrior, adapted to serve as a scout for the Hive Fleets. Lictors form the vanguard of the swarm, constantly searching for pockets of resistance to eliminate and indigenous life forms to absorb.

They can move quickly and silently through almost any type of terrain. The unique properties of their carapaces camouflage them so effectively that they become practically invisible to the naked eye.

Lictors can remain hidden for days, motionless and undetected by their future victims. They are the unseen heralds of the disaster to come.

The Lictor's aggressive instincts are relatively underdeveloped, as it was created primarily to locate prey. Lictors are opportunistic hunters that prefer to stalk the shadows and avoid direct confrontations that might turn against them.

A Lictor usually kills its victims after they have become separated from their companions. It may then remain hidden for days before resuming its predations.

Lictors have the **Infiltration**, **Semi-Synaptic (Hunt)**, and **Advanced Camouflage** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	5+	+5	5	Hooks	20 cm	2	5+	0

10.10 Termagants

Termagants are fast, agile, and cunning. They are among the smallest creatures of the Hive Mind, measuring little more than two metres in length. They were originally created to patrol the passageways of the bio-ships and defend them against intruders.

During planetary invasions, Termagants accompany Tyranid Warriors, running at their feet upon four limbs while unleashing torrents of anti-personnel fire. They are commonly armed with Fleshborers held in the claws of their forelimbs.

A Termagant's mind is cunning but limited, and the creature may become confused if separated from the Hive Mind. When this occurs, its survival instinct takes control, causing it to abandon the fighting and seek shelter.

For this reason, an army that has repelled a Tyranid assault must advance cautiously. Every cellar, building, or patch of woodland may conceal a nest of Termagants that will defend itself with unimaginable ferocity if discovered.

Termagants have the **Slave (Hunt)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	–	+1	6	Fleshborer	30 cm	1	5+	0

11 Cavalry

11.1 Raveners

Raveners are little more than mindless predators whose clawed, serpentine bodies are driven by a consuming hunger that has few equals, even among the ravenous Tyranid race. Their knotted muscles grant them unimaginable speed across almost any type of surface.

They can effortlessly leap over smaller obstacles, weave swiftly through ruins, and even race across swamps at terrifying speed. However, this is neither their primary means of approach nor the one most feared by their prey, for when a Ravener charges openly, its victim at least has an opportunity to see it coming.

A Ravener's immense physical strength allows it to burrow for great distances beneath the surface of a world before erupting from the ground beneath an enemy position in an explosion of earth, its claws lashing in every direction and its chest-mounted weapons spitting death.

Raveners receive Orders normally when they arrive on the battlefield, provided they are within the Hive Mind Radius of a Synapse base when Orders are assigned.

Raveners have the **Deep Strike (2)**, **Walker**, and **Slave (Devastation)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	6+f	+4	6	Devourer	20 cm	2	5+	-1

12 Walkers

12.1 Carnifex

Carnifexes are living engines of destruction: monsters covered in thick armour and possessed of phenomenal strength. They are among the most resilient and deadly war beasts of the Hive Fleets, having been created to spearhead assaults.

Although the Hive Mind has spawned other, larger creatures, few can rival a Carnifex in terms of sheer strength and destructive capability.

Carnifexes have the **Fear**, **Slave (Devastation)**, **Damage (+1) in Assault**, and **Regeneration (5+)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	3+	+6	6	Bio-Plasma	30 cm	1	4+	-2

12.2 Winged Hive Tyrant

A relatively recent addition to the Tyranid arsenal, Winged Hive Tyrants can be seen directing Gargoyle raids deep within enemy territory.

Like their more common counterparts, Winged Hive Tyrants drive nearby swarms onward and spread the influence of the Hive Mind throughout the seething hordes.

Winged Hive Tyrants have the **HQ**, **Elite (2)**, **Regeneration (5+)**, **Antigrav**, **Fear**, **Damage (+1) in Assault**, **Psychic Save (4+)**, and **Synapse (20 cm)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
25 cm	3+	+7	-	Devourer	20 cm	2	5+	-1

12.3 Hive Tyrant

Hive Tyrants are the commanders of the Tyranid swarms and the executors of the Hive Mind's will. They are invariably immense and heavily muscled creatures, standing almost as tall as a Dreadnought.

They possess extraordinary strength and can tear through plasteel and ferrocrete with their claws. Every part of a Hive Tyrant's body appears to have been designed to maim or kill, including the pointed layers of chitin covering its limbs.

A Hive Tyrant is a formidable opponent at any distance, equally dangerous when armed with a venom cannon or stranglethorn cannon as it is with a bonesword or its bare claws.

Hive Tyrants have the **HQ**, **Elite (2)**, **Fear**, **Regeneration (5+)**, **Psychic Save (4+)**, and **Synapse (20 cm)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	3+	+6	-	Deathspitter	45 cm	2	4+	-1

12.4 Venomthrope

The Venomthrope is a gaunt creature whose tentacular limbs and knotted body exude alien toxins. It releases clouds of spores resembling sickly yellow vapours, which contain voracious organisms hostile to all non-Tyranid life.

Even brief exposure to this gas causes nausea and uncontrollable muscular spasms, leaving the victim at the mercy of the Venomthrope and nearby Tyranids. If the prey has the misfortune of remaining in contact with the gas for even a minute, the organisms begin burrowing into its body.

The Venomthrope has the **Slave (Devastation)** and **DR (5+)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	4+	+4	6	Spore Nest	-	-	-	-

12.5 Zoanthrope

Zoanthropes were created solely to channel the psychic potential of the Hive Mind, and their bodies are entirely dedicated to this function.

A Zoanthrope's connection to the synaptic network is so powerful that, by focusing even the smallest fraction of its mind, it can project a blast of force powerful enough to disintegrate adamantium and boil flesh.

The Zoanthrope has the **Semi-Synaptic (Nest)**, **Protection (4+)**, and **Psychic Save (4+)** abilities. Its Warp Blast is a **Psychic Attack** and has the **Anti-Aircraft against targets at Altitude** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
10 cm	5+	+1	5	Warp Blast	60 cm	1	4+	Psy

13 Vehicles

13.1 Biovore

The Biovore is a squat and bloated creature, but this makes it no less dangerous. Its massive body constantly produces Spore-Mines: living bombs that explode in a spray of acid and razor-sharp bone fragments.

Biovores advance ponderously across the battlefield, using the bony protrusions on their forelimbs to anchor themselves to the ground before firing. With a powerful muscular spasm, the Biovore launches its Spore-Mines into the air. Each mine contains a gas-filled bladder that slows its descent.

Even if the shot misses its intended target, the Spore-Mine remains dangerous. Its rudimentary intelligence prevents it from detonating upon impact, instead causing it to drift towards nearby prey before exploding. Each Biovore fires one Spore-Mine per turn.

The Biovore has the **Walker** and **Slave (Nest)** abilities. Its Spore-Mines have the **Bio-Toxins**, **Artillery**, **Battery**, **Template (12 cm)**, **Spore-Mines**, and **Reduces Cover (-1)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	4+	+0	6	Spore-Mines	90 cm	Template	4+	-1

13.2 Dactylis

Dactylis are creatures specialised in long-range fire, delivering deadly barrages upon the prey of the Hive. Their Bile Pods can eat through even the strongest armour and plasteel, seeping through walls and defensive barriers.

The Dactylis has the **Walker** and **Slave (Nest)** abilities. Its Bile Pods have the **Artillery** ability. The Bile Pods – Spores firing mode also has the **Reduces Cover (-2)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	3+	+1	6	Bile Pods – Spores	90 cm	2	3+	0
				Bile Pods – Bio-Acid	90 cm	2	4+	-2

13.3 Exocrine

The Exocrine is effectively the means of transportation for the symbiotic weapon attached to its back. Although it possesses colossal physical strength, the Exocrine has a tiny brain whose capabilities are far inferior to those of the bio-weapon it carries.

It is not uncommon for the weapon to direct the Exocrine's behaviour, guiding it towards an advantageous firing position. Only when its host has become stationary can the weapon concentrate fully upon destroying its prey.

Despite the Exocrine's relative simplicity, it is perfectly adapted to its role. Batteries of these ponderous beasts can devastate armoured columns or tightly packed formations of infantry.

The Exocrine has the **Walker** and **Slave (Nest)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	3+	+1	6	Bio-Plasma Cannon	75 cm	2	4+	-3

13.4 Harpy

The Harpy is a monstrous organism capable of weaving through the skies with a speed and precision that even the most advanced conventional fighter aircraft could only dream of matching.

As it glides over the prey world, it releases a rain of living bombs and spits death from the bio-weapons fused to its forelimbs. Harpies appear during the opening stages of a Tyranid attack, working alongside Gargoyles to drive their prey from cover. Although the two species share the same purpose, they are physically very different.

The Harpy has the **Semi-Synaptic (Hunt)** and **Floater** abilities. Its Spore-Mines have the **Bombardment (1)**, **Template (7.5 cm)**, **Bio-Toxins**, **Spore-Mines**, and **Battery** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
25 cm	3+	+4	5	Venom Cannon	30 cm	2	4+	-1
				Spore-Mine	Bomb	Template	4+	0

13.5 Haruspex

The Haruspex is a ferocious beast created for the sole purpose of consuming astronomical quantities of biomass. Its insatiable appetite drives it to seek out ever more prey to devour.

Few enemies are foolish enough to stand against a Haruspex, for it can consume an entire platoon within a matter of seconds, swallowing soldiers one after another into its gaping maw without ever appearing satisfied.

Prey too large to swallow whole is simply torn into more manageable pieces by its enormous claws. Buildings are smashed open and tanks ripped apart, their occupants devoured before they can even understand what is happening.

Only those who choose to flee have any chance of escape, and then only if they can avoid the Haruspex's long, extendable tongue, which strikes like lightning to seize its victims before drawing them into its cavernous mouth.

The Haruspex has the **Slave (Devastation)** and **Walker** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+7	6	Hooks	20 cm	2	5+	0

13.6 Malefactor

Malefactors are enormous organic transports protected by reinforced chitin plates that provide armour comparable to that of the heaviest tanks.

Armed with Fragmentation Spines, Malefactors are formidable transports capable of providing fire support to their troops after they have disembarked.

The Malefactor has the **Slave (Devastation)**, **Attached Transport**, **Walker**, and **Transport (2)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+5	Attached	Fragmentation Spines	20 cm	2	5+	0

13.7 Neurotyrant

Neurotyrants are masses of tentacles and chitin that act as powerful synaptic nodes for the Hive Mind. This same biological structure also allows them to float slightly above the ground.

Their unique cerebral structure acts as a focal point for the Shadow in the Warp, increasing the psychic pressure upon their enemies. Neurotyrants function as mobile command centres, providing surges of energy to nearby Tyranid creatures.

The Neurotyrant has the **Leader**, **Synapse (30 cm)**, **Dark Presence (-1/12 cm)**, and **Walker** abilities. Its Energy Torrent has the **Reduces Cover (-3)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	3+	+2	-	Energy Torrent	20 cm	2	4+	0

13.8 Pyrovore

The role of a Pyrovore is to predigest biomass. Its jaws drip with an acid capable of reducing flesh, metal, and even stone into a pulp that can easily be absorbed by other Tyranid organisms.

However, the Pyrovore's most effective weapon is the dorsal cannon capable of spitting great spheres of flame.

The Pyrovore has the **Walker** and **Slave (Nest)** abilities. Its Bio-Flame Lance Cannon has the **Artillery** and **Reduces Cover (-3)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	4+	+0	6	Bio-Flame Lance Cannon	30 cm	2	3+	0

13.9 Mycetic Spore

Mycetic Spores are far more than simple landing modules for the Tyranids: they are living members of the species. The Tyranids are a spacefaring race, but they hunt only upon the ground.

There are many different kinds of spores. Some affect the climate, while others alter the native fauna or flora. From a military perspective, without Mycetic Spores the Hive Fleets and Norn Queens would be forced to break through planetary defences directly and expend enormous quantities of energy merely to feed.

Mycetic Spores allow a Hive Fleet to bombard a planet with swarms of organisms and delay its final assault until the planetary defences have already been weakened.

The Tyranids' use of Mycetic Spores is comparable to a human tasting a fine wine before drinking it. The main course has not yet been served, but the meal has already begun.

Mycetic Spores have the **Deep Strike (2)**, **Mycetic Spore**, and **Transport (Special)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
0 cm	3+	+0	-	-	-	-	-	-

13.10 Tervigon

The Tervigon is an enormous monster whose swollen abdomen is protected by a thick carapace. Although it possesses a formidable arsenal of bio-weapons, titanic claws capable of crushing any prey that ventures too close, and spine launchers that can strike enemies at considerable range, the greatest danger lies within its belly.

Every Tervigon is a living incubator containing numerous dormant Termagants held in a state resembling hibernation. With a mental impulse, the Tervigon can awaken its offspring at will.

An enemy attempting to engage a Tervigon may therefore find itself confronted by a swarm of Termagants emerging from its abdomen. Such a confrontation is particularly dangerous, as the Tervigon can continually reinforce the ranks of its offspring, which are driven into a battle frenzy to protect their progenitor.

A Tervigon can only transport Termagant bases.

The Tervigon has the **Slave (Devastation)**, **Regeneration (5+)**, **Attached Transport**, **Walker**, and **Transport (4 Termagants)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+5	Attached	Fragmentation Spines	20 cm	2	5+	0

13.11 Toxicrene

The enormous monster known as the Toxicrene appears deadly through its sheer size alone. It advances across the battlefield with ponderous steps, crushing enemy warriors with its treacherous tentacles.

However, it is not the Toxicrene's immense strength that makes it one of the most feared creatures in the Hive Fleet's arsenal. Its greatest threat comes from the clouds of toxic spores expelled from the vents along its back. These spores enter the lungs of their victims and cause them to drown in their own blood.

The foul toxic emissions contain billions of embryonic microscopic organisms, each possessing a predatory awareness. When the Toxicrene releases its lethal payload, these spores invade non-Tyranid life forms and overwhelm even the most resilient immune systems, inflicting an exceptionally painful and horrific death.

The Toxicrene's emissions are so effective that neither biological protection equipment nor even Power Armour can guarantee safety from them.

The Toxicrene has the **DR (5+)**, **Walker**, and **Slave (Devastation)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+5	6	Spore Nest	–	–	–	–

13.12 Virago

The Hive Virago is a flying monstrosity used by the Tyranids to establish aerial superiority. It is perfectly adapted to aerial combat and can clear the skies of enemy aircraft regardless of their sophistication.

Hive Viragos frequently conceal their attacks behind flights of Gargoyles, hiding within the moving cloud of membranous wings until the final moment, when they break away to descend upon their prey and deliver a decisive strike.

The Virago has the **Interceptor**, **Semi-Synaptic (Devastation)**, and **Floater** abilities. Its Salivary Cannon has the **Reduces Cover (–3)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
25 cm	3+	+6	5	Salivary Cannon	20 cm	2	4+	0

14 Knights

14.1 Barbed Hierodule

Like the Scythed Hierodule, the Barbed Hierodule has spread throughout the Hive Fleets. During the infernal fighting on Dantris, twenty-six Hierodules were recorded as having been destroyed.

On Beta Anphelion IV, Inquisitor Lok's forces encountered at least four Hierodules of both types. Inquisitor Lok personally destroyed one, while another was brought down by the concentrated heavy-weapons fire of the Cadian troops defending the Theta laboratories. Those same troops were later overwhelmed by a Tyranid swarm led by one of the surviving Hierodules.

The Barbed Hierodule has the **Terror**, **DR (5+)**, **Regeneration (5+)**, **Wounds (3)**, **Slave (Nest)**, and **Psychic Save (4+)** abilities. Its Bio-Cannons have the **Damage (+1)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+10	5	Bio-Cannons	75 cm	2	3+	-3
				Fragmentation Spines	20 cm	5	5+	0

14.2 Scythed Hierodule

The Scythed Hierodule was first recorded during the invasion of Hamman, a small Imperial colony. During the battle, the planet's garrison mounted a heroic defence but was ultimately defeated.

The Scythed Hierodule played a major role at the forefront of the Tyranid assault, leading swarms of smaller Gaunts against the forts and ferrocrete defensive structures erected by the Planetary Defence Forces.

The Scythed Hierodule has the **Terror**, **DR (5+)**, **Regeneration (5+)**, **Wounds (3)**, **Psychic Save (4+)**, **Damage (+2) in Assault**, and **Slave (Devastation)** abilities. Its Pyro-Acid Jet uses a **Flame Template** and has the **Reduces Cover (-3)** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+12	5	Pyro-Acid Jet	0 cm	Template	4+	-1

14.3 Razorfex

The Razorfex is an enormous variant of the Carnifex. It is a gigantic, howling monster that destroys everything in its path.

The Razorfex has the **Wounds (2)**, **Fear**, **Regeneration (5+)**, **Damage (+2) in Assault**, and **Slave (Devastation)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+9	5	Bio-Plasma	30 cm	1	3+	-2

14.4 Trygon

The Trygon is a serpentine creature so colossal that it towers over even the enormous Carnifex. It is entirely covered by a thick carapace of bony plates.

As the Trygon moves, these plates grind against one another, generating a bio-static charge that travels along its body and gathers around its forelimbs. By releasing an ionised breath through its vents, the Trygon can discharge this energy as a high-voltage electrical blast capable of burning its prey down to the bone.

A Trygon's claws are not only formidable weapons but also allow it to burrow through almost any material. When a Trygon detects an enemy upon the surface, it erupts from the ground in a shower of debris and throws itself upon the nearby soldiers and vehicles.

The Trygon has the **Character**, **Regeneration (5+)**, **Integral Armour**, **Wounds (2)**, **Deep Strike (2)**, **Underground Assault**, and **Synapse (15 cm)** abilities. Its Bio-Shock has the **Reduces Cover (-1)** ability.

Its Lightning inflicts 1D3 hits upon bases in contact with the Trygon immediately before resolving the assault. The Tyranid player chooses how these hits are allocated. Lightning does not suffer the To Hit penalty caused by the Trygon being engaged in an assault.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	2+	+7	–	Bio-Shock	20 cm	3	3+	–2
				Lightning	Assault	1D3	3+	–1

14.5 Tyrannofex

There can be no doubt that the Tyrannofex exists solely to spread destruction, for it is built to withstand the full brutality of the battlefield.

Striding towards its prey, this giant deals death from afar and breaks enemy lines with volleys from its merciless bio-cannon. The only way to halt its relentless advance is to bring the beast down, but the Tyrannofex possesses the endurance of a living fortress and pays little heed to anything but the heaviest weapons.

Protected by layers of ablative chitin, the Tyrannofex is as resilient as any war machine produced by conventional industry. Its carapace is so thick and its endurance so great that it can rival the most powerful engines of war.

Spine launchers embedded among the chitin plates on its back provide effective anti-personnel protection, but it is the enormous bio-cannon mounted upon its forelimbs that has earned the beast its sinister reputation throughout the galaxy.

There are two versions of the Tyrannofex: the Assault Tyrannofex and the Support Tyrannofex.

14.5.1 Assault Tyrannofex

The Assault Tyrannofex has the **Wounds (2)**, **DR (4+)**, **Regeneration (5+)**, **Fear**, **Damage (+1) in Assault**, and **Slave (Devastation)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+8	7	Spore Cloud	–	–	–	–

14.5.2 Support Tyrannofex

The Support Tyrannofex has the **DR (6+)**, **Wounds (2)**, **Regeneration (5+)**, **Fear**, and **Slave (Nest)** abilities. Its Bio-Cannons have the **Turret** ability.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	2+	+5	7	Bio-Cannons	60 cm	2	4+	–3
				Fragmentation Spines	20 cm	5	5+	0

14.6 Norn Queen

Some Tyranid Hive Ships contain immense chambers hundreds of metres high, occupied by creatures so vast that their bodies fill almost the entire space. These creatures are the Norn Queens, the progenitors of the Hive Mind.

Norn Queens are enormous biological factories whose sole purpose is to create Tyranid organisms. They can absorb biomass and manipulate it in countless ways, continually adapting their “offspring” to the requirements of each conquest.

Every organism within a Hive Fleet, from the smallest creature to every species and individual variant, owes its existence to the Norn Queens.

The Norn Queen has the **Character**, **Terror**, **Wounds (3)**, **Regeneration (5+)**, **Psychic Save (4+)**, **Psyker**, **Synaptic Overload**, **Damage (+1) in Assault**, **Forward Observer**, and **Synapse (30 cm)** abilities.

In addition, the Norn Queen may use one of its psychic powers each turn.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	2+	+10	–	Venom Cannon	45 cm	2	4+	–2

15 Super-heavies

15.1 Dominatrix

The Dominatrix is a truly colossal Tyranid creature. Its sheer mass and arsenal of bio-weapons allow it to overcome an entire squadron of Imperial super-heavy tanks.

Furthermore, it is far from being a mindless monster. Its intelligence is equal to that of the Hive Tyrants, while its empathic connection to the Hive Mind surpasses even that of those powerful creatures.

As long as lesser Tyranid creatures remain close to a Dominatrix, they become extensions of its will. A swarm directed by a Dominatrix therefore operates with unparalleled efficiency and tactical brilliance.

The Dominatrix has the **Character**, **DR (6+)**, **Wounds (5)**, **Regeneration (5+)**, **Terror**, **Psychic Save (2+)**, **Psyker**, **Synaptic Overload**, **Forward Observer**, and **Synapse (45 cm)** abilities. Its Bio-Plasma Cannons have the **Turret** ability.

In addition, the Dominatrix may use one of its psychic powers each turn.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
15 cm	2+	+10	–	Bio-Plasma Cannons	75 cm	4	4+	–3

15.2 Harridan

Harridans are the largest flying Tyranid creatures capable of atmospheric flight ever encountered by the Imperium during its relentless war against the intergalactic threat. They are gigantic monsters comparable to the wyverns and dragons of ancient legend.

Circling high above the battlefield and gliding upon the warm thermal currents of war with its vast leathery wings outstretched, the Harridan watches patiently before diving upon the battlefield to strafe its enemies with its ventral Bio-Cannons.

The Harridan has the **Regeneration (5+)**, **Synapse (20 cm)**, **Wounds (3)**, **Floater**, **Infiltration**, and **Transport (5 Gargoyles)** abilities.

Its Spore Cloud has the **Template (7.5 cm)**, **Bio-Toxins**, and **Bombardment (1)** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
20 cm	2+	+5	–	Bio-Cannon	45 cm	3	4+	–2
				Spore Cloud	0 cm	Template	2+	0

16 Titans

16.1 Alpha Hierodule

Like all Tyranid organisms, Bio-Titans are characterised by their rapid adaptations. Much like the bio-ships that created them, Bio-Titans are amalgamations of numerous organisms fused together until they resemble a single living creature.

Bio-Titans are notoriously difficult to destroy, even with super-heavy weapons. They are protected by overlapping chitin plates angled to deflect incoming fire. Even if this carapace is penetrated, the composite nature of these monsters means that a fatal blow against one symbiotic organism is unlikely to destroy the creature as a whole.

Only the concentrated firepower of a Titan or an entire artillery company can hope to bring down a Bio-Titan before it spreads destruction throughout the enemy ranks.

The Alpha Hierodule is the smallest but also the most widespread Bio-Titan.

The Alpha Hierodule has the **Wounds (6)**, **Agile**, **Terror**, **DR (5+)**, **Regeneration (4+)**, **Psychic Save (4+)**, **Damage (+2) in Assault**, and **Semi-Synaptic** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
25 cm	2+	+13	–	Fragmentation Spines	20 cm	2	4+	0
				Choose 2 weapons				

16.2 Hierophant

The Hierophant Bio-Titan is an immense, hideous, spine-covered creature that towers over the battlefield. It is among the largest bio-creatures ever encountered within the swarms of the Hive Fleets and is comparable in size and power to an Imperial Titan.

A brood of Hierophants is invariably found at the forefront of a major Tyranid attack. Advancing with enormous strides, they draw enemy heavy-weapons fire away from lesser creatures and absorb tremendous punishment before crashing into the enemy lines with devastating force.

The Hierophant is the Tyranids' largest shock creature. It is armed with a massive Bio-Cannon, numerous claws, and chitinous blades. Its body is protected by a thick chitinous hide that releases toxic spores through the gaps between its armour plates.

The Hierophant has the **Wounds (9)**, **DR (5+)**, **Agile**, **Regeneration (4+)**, **Terror**, **Psychic Save (4+)**, **Transport (5)**, **Damage (+2) in Assault**, and **Semi-Synaptic** abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
25 cm	2+	+17	–	Fragmentation Spines	20 cm	3	4+	0
				Choose 3 weapons				

17 Heavy Artillery

17.1 Off-Table Artillery

Off-Table Artillery represents either long-range bio-weapon batteries deployed at a safe distance behind the combat zone or orbital or naval artillery. See the General Rules for further details regarding its use.

The **Bio-Plasma Shot** uses a **Template (7.5 cm)** and has the **Reduces Cover** (−3) ability.

The **Spore-Mine Shot** uses a **Template (12 cm)** and has the **Spore-Mines**, **Bio-Toxins**, and **Reduces Cover** (−1) abilities.

Movement	Save	AF	Morale	Weapon	Range	Dice	To Hit	AP
–	–	–	–	Bio-Plasma	–	Template	3+	−2
–	–	–	–	Spore-Mines	–	Template	4+	−1
