2 History of the Necrons

A terrifying race is slowly awakening across the galaxy. Its members have lain in hibernation in stasis crypts for entire ages, waiting for the galaxy to recover from its ills. Now, after more than sixty million years of absence, their great work may begin. On desolate worlds thought devoid of life, ancient machines stir again and activate reanimation protocols so that the beings in their charge may once more walk among the stars. The dread Necrons have returned, to the galaxy's great misfortune.

Every Necron, from the humblest warrior to the greatest lord, is driven by a single purpose: to restore the glory of their ancient dynasties by re-establishing their hegemony over the galaxy. Such was the edict encoded into the mind of every Necron millions upon millions of years ago, and it is now so deeply implanted that they simply cannot ignore it. It is, however, a task almost impossible to complete, for the galaxy has changed greatly since the Necrons left it to plunge into a long sleep in the depths of their Tomb Worlds. Many of their refuge planets have been destroyed by cosmic disasters or xenos invasions. Others have suffered grave failures, and their buried legions are afflicted with madness or have been irreparably damaged by the irresistible touch of entropy. Degenerate races now inhabit the ruins of some Tomb Worlds, unaware of the remnants of the grandiose civilisation they profane by their mere presence. Unfortunately for them, their ignorance will not protect them when the Necrons come to reclaim what they consider theirs...

If billions of Necrons have been defeated by the passage of time, still more have survived in order to restore their ancient domains. They are no longer creatures of flesh and blood, but android warriors whose immortal form is forged from living metal. Thanks to it they have become almost indestructible, for their bodies can repair and regenerate all damage. Severed limbs can be reattached, armour plates rewelded, and dislocated mechanical organs reconstituted. The only way to finish a Necron is to inflict such damage that its self-repair systems cannot undo it. In the event of irreparable damage, the Necron dematerialises: teleport beams return it to its stasis crypt, where it remains until the damage can be treated by systems still more sophisticated than those of its body.

The technology that allows such wonders remains a mystery to the other races, for the Necrons do not share their secrets and have put protocols in place to prevent them from falling into foreign hands. Indeed, if a Necron fails to dematerialise, it self-destructs in an emerald fireball. Victory against the Necrons is a concept that suddenly seems quite abstract, for a battle turning in the enemy's favour is in no way a firm and final triumph. For the Necrons, defeat is only a minor inconvenience, the prelude to future successes. Immortality has made them patient, and having survived the perils of ancient times has proved to them that with will, their race can overcome every trial. And if there is one thing the Necrons do not lack, it is a will as solid as adamantium. The other races have only a faint hope of resisting the silent legions that rise from their tombs, by preventing their awakening and stopping the Tomb Worlds from uniting, lest the great powers of the galaxy sink to the profit of the Necron dynasties.

Since the first signs of Necron activity, it has never been possible to capture even a single specimen for examination in the laboratories of the Adeptus Mechanicus. Nevertheless, thorough investigations by the Ordo Xenos with the support of specialised Deathwatch teams have established the following facts. It is impossible to recover even the most damaged Necrons because of a powerful internal **Deep Strike (1)** system that invariably returns them to their catacombs. That is why the only concrete information we possess to date on these beings resides in video recordings.

In general, Necrons of a particular type are all identical, apart from minor details such as their insignia or their degree of oxidation, which may vary according to their world of origin. Necron Warriors, by far the most common, are humanoid in form: bipeds with arms ending in articulated fingers that allow them to handle strange weapons. They share many similarities with the human body, such as joints at the shoulders and hips, thumbs, and a flexible spine. We know that their resemblance to the human skeleton is not accidental: they convey the image of death, probably in order to instil fear and panic in enemy ranks. Their appearance therefore leads one to think that the Necrons exist only to spread war and terror through the galaxy. Necrons are hunched, so that their carapace-shaped shoulder blades reach the level of their heads. They walk slightly crouched, which gives them a morbid gait accentuated by their deathly silence. Some Necrons have been observed moving with ease, while others advance in a jerky manner. It has been suggested that this difference is directly linked to how long these beings have been active.

Necrons are invariably metallic. For the moment we can only speculate as to the nature of the metal of which they are made, but it seems that even if it does not have the resistance of the best Imperial alloys, it is quite capable of absorbing numerous impacts, including Heavy Bolter bursts. The protection it confers also extends to other domains: Necrons are insensitive to conventional toxins and to extreme temperatures. They can moreover operate in the vacuum of space and appear to possess no nervous system. By their nature, it seems likely that they would prove vulnerable to attacks based on concentrated acid and to intense electromagnetic discharges. This last point remains a hypothesis, and members of the Ordo Xenos conduct experiments on the subject at every opportunity.

3 Special Rules

3.1 Reserve

The Necrons strike suddenly and vanish without leaving a trace. Their mastery of teleportation gives them tactical opportunities for redeployment and an optimal distribution of their forces.

During army deployment, any detachment may be placed in Reserve so long as it has a means of arriving on the battlefield, such as Portals large enough for it or special rules or abilities such as Deep Strike. Detachments in Reserve receive orders normally, but may activate only to join the field during their activation.

A detachment in Reserve that no longer has a means of entering the battlefield is considered destroyed.

3.2 Phase Out

Necron commanders follow their own patterns and sometimes vanish without warning. When a Necron detachment with several bases is Broken, it must make a Phase Out roll. To do so, roll 1D6: on a 2+ nothing happens; otherwise they disappear from the battlefield and are considered destroyed. If there is a character attached to the detachment, this roll automatically succeeds.

3.3 Engines of Destruction

Only one Engine of Destruction is allowed in a Necron army per 5000 points. The Engines of Destruction are the Abattoir and the Aeonic Orb.

3.4 Scarabs

Canoptek Scarabs are small beetle-like robots, constantly repairing damaged Necrons. Moving in a silent hover through the empty corridors of the Tomb World's necropolis, they are among the countless mechanical servants used for maintenance for millennia.

Scarab tokens may be used by any Necron base of class 1 or 2. Each token may be used in two ways.

Assault: A class 1 or 2 base directs the Scarabs that attack the enemy. In addition to its ranged weapons, the base gains a one-use shot that uses a Template (7.5 cm), hits on 5+, has a range of 20 cm, no AP, and the Reduces Cover (−1) ability. A base may benefit from only one Scarab token per turn in this way.

Repair: when a base makes a Reanimation Protocols roll, you may use a Scarab token to improve the base's chance of success by 2.

4 Special Abilities

4.1 Portal

The Necrons use Portals to cross long distances. Crossing a Portal allows a detachment:

- To enter the battlefield from Reserve.
- To pass from one Portal to another on the battlefield.

In both cases, crossing a Portal costs 5 cm of movement to the detachment that crosses it and nothing to the base that has the Portal. The same detachment may cross several Portals during its activation. Portals are limited in the number of detachments that may exit them per turn, as well as the maximum class of bases that may cross them.

Bases exiting a Portal follow the rules for exiting a transport. A detachment crossing a Portal must do so entirely. Only allied Necrons may use a Portal.

Troop	Class that may cross	Detachments that may exit
Monolith and Doomsday Monolith	Class 1	2 detachments per turn
Abattoir	Classes 1 and 2	1 detachment per turn per Portal still active
War Barge	Classes 1, 2 and 3	5 detachments per turn

4.2 Deathmark

Deathmarks may make Intercept Fire on an off-table arrival as if it were a normal movement.

If a Deathmark detachment is not yet present on the table, it may make its off-table arrival in reaction to an enemy off-table arrival. If you decide to do so, wait until the enemy bases have been placed, then you may place the Deathmark bases directly base-to-base with those of the targeted detachment; they are considered to have charged. They gain a +2 AF bonus for that turn.

4.3 Invasion Beams

A detachment with this ability may open a Portal during its movement for a single Necron infantry detachment placed in Reserve, along its path.

4.4 Targeting Relay

If a base with this ability scores a hit on a detachment, place a marker next to it. All bases from this codex then gain the Reduces Cover (−3) ability if they shoot at a detachment thus designated. Remove all markers during end-of-turn effects.

4.5 Reanimation Protocols (X+)

If a detachment with bases that have this ability is not at full strength in the End-of-Turn Effects phase, but still has at least 1 base present on the table, it is possible to attempt to reanimate the losses. To do so, roll a die for each missing base; on an X+ it is reanimated. Bases thus returned to play must be in coherency with the detachment and may not be placed in an enemy base's Control Zone.

4.6 Scarab Generator

The Necron player gains one Scarab token per base with this ability at the moment of activation in the Movement Phase of the detachment that has Scarab Generator.

4.7 Repair Platform

Any Necron Warrior or Immortal base within 12 cm of a base with this ability gains a bonus of 1 to its Reanimation Protocols roll.

4.8 Resurrection Orb

Once per battle, a detachment within 12 cm of a base with this ability may increase its Reanimation Protocols rolls by 1.

4.9 Reanimator

Any detachment within 12 cm improves its Reanimation Protocols rolls by 1.

4.10 Outcasts

Bases with this ability may never use a Portal.

4.11 Soulless

Any detachment within 25 cm of a base with this ability is considered to have a Morale of 7, unless it is already worse (that is, a higher value). Detachments with no Morale value are not affected.

4.12 Doomsday Cannon

The Doomsday Cannon has three firing modes; it may use only one per turn. Diffuse mode and Concentrated mode may be used only if the Ark has not moved this turn, which includes surprise attacks.

4.13 Anti-Gravitic Matrix

Any enemy base at altitude within 25 cm of a base with this ability is affected as by a shot hitting on 4+ with AP -2 and the AA ability. If the enemy fails its save, it crashes to the ground and is automatically destroyed. This ability does not stack if several matrices overlap.

4.14 Containment Failure

If a shard is destroyed, its necrodermis body explodes immediately. All bases within 2D6 cm suffer a hit on 3+ with AP 0; this does not affect troops in garrison.

4.15 Absorption

Each time the Void Dragon destroys an enemy base of class 3 or more, it regains a lost Wound on a 4+ (maximum 2 per turn).

4.16 Reinforced Necrodermis

Bases with this ability divide the damage they suffer by 2, rounded down, with a minimum of 1. That is, an attack with Damage (+3) inflicts 2 damage instead of the usual 4.

4.17 Organic Metal (X)

A base with this ability has X Organic Metal points. Each shot that hits a target with Organic Metal points hits the Organic Metal rather than the target. Organic Metal tokens have a 1+ save and are destroyed at the first failed save.

Organic Metal has no effect in assault.

4.18 Dimensional Translocation

The War Barge is able to widen the rift in reality where it appears. To represent this, place a Template (12 cm) centred on the War Barge's point of arrival. All bases under the template (except the War Barge) are hit on 4+ with AP -3; those that survive are placed on the edges of the template, as close as possible.

4.19 Aeonic Orb

The Aeonic Orb begins the game with three plasma tokens in its Plasma Chamber (the maximum). The Aeonic Orb regenerates 2 plasma tokens each Final Phase, during end-of-turn effects. These tokens are used to fire the Solar Flare. Unused plasma tokens may be stored and used in later turns.

It is possible to make the following 3 firing modes:

- Burst Fire, which costs 1 plasma token
- Light Fire, which costs 2 plasma tokens
- Powerful Fire, which costs 3 plasma tokens

4.20 My Will Be Done

All allied class 1 detachments activating in the Movement Phase within 12 cm of a base with this ability receive +5 cm to their total movement even if the base with this ability is in a transport. Detachments embarked at the start of movement or arriving from a Portal within 12 cm of the base also benefit from this ability.

5 Psychic Powers

5.1 Cryptek

5.1.1 Harbinger of Despair [Movement Phase, on activation]

The Cryptek gains the Fear and Dread (−1) abilities for the rest of the turn.

5.1.2 Harbinger of Destruction [Combat Phase, Shooting]

The Cryptek makes an attack with a range of 60 cm, hitting on 3+ with AP −2.

5.1.3 Harbinger of Eternity [Movement Phase, on activation]

The Cryptek gains the Reanimator ability for this turn.

5.2 C'tan Shard

5.2.1 Meteor [Combat Phase, Shooting]

Place a Template (7.5 cm) at 45 cm and in Line of Sight. The template hits on 3+, AP −3, and Damages Buildings (AP −3/3).

5.2.2 Time's Arrow [Combat Phase, Shooting]

Choose a target at 45 cm and in Line of Sight. It is hit on 3+ with AP −4 and Damage (+1).

5.2.3 Seismic Assault [Combat Phase, Shooting]

Place a Template (12 cm) at 45 cm and in Line of Sight. This template hits on 3+ with AP 0; the template has the Reduces Cover (−1) and Subterranean Fire abilities.

5.3 Nightbringer

5.3.1 Deadly Gas [Combat Phase, Shooting]

Place a Template (7.5 cm) at 45 cm and in Line of Sight of the Nightbringer. The template hits class 1 and 2 bases on 3+, otherwise on 5+. This attack is a Psychic Power.

5.4 Void Dragon

5.4.1 Voltaic Storm [Combat Phase, Shooting]

Choose an enemy detachment of class 3 or more at 45 cm and in Line of Sight of the Void Dragon. The detachment suffers 1D3 hits on 2+ with AP −3 that Reduce Cover (−3).

5.5 Transcendent C'tan

5.5.1 World Pain

Passive permanent power. Enemy detachments within 20 cm of the Transcendent C'tan do not benefit from cover saves. This is a Psychic Power.

6 Unit Profiles

Name	Movement	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP	Weapon Abilities
Infantry (1)										
Cryptek*	10 cm	5+/6+f	+2	-	Eldritch Lance	60 cm	1	4+	-2	-

6	Player's choice

8.5 Damage Effects

Damage effects are progressive: the first damage to a location applies the first effect, and further damage applies the following effects on the list.

Hull	
1	–
2–3	1 additional damage
4+	2 additional damage

Weapon	
1	Weapon Damaged (Repair on 4+)
2	Weapon Destroyed
3+	Damage to the Hull

Portal (Abattoir)	
1	1 Portal Destroyed
2	1 Portal Destroyed
3	1 Portal Destroyed, 1 additional damage
4	1 Portal Destroyed, 1 additional damage
5+	Damage to the Hull

Harvesters	
1	–
2	1 Harvester Damaged (Repair on 4+)
3	1 Harvester Damaged (Repair on 4+)
4	1 Harvester Damaged (Repair on 4+)
5	1 Harvester Damaged (Repair on 4+)
6+	Damage to the Hull

Leg / Antigrav Generator / Base / Fire Control	
1	–5 cm of base movement (Repair on 4+)
2	an additional –5 cm of base movement (Repair on 4+) (from this damage, if the titan is destroyed it falls)
3	Immobilised, 1 additional damage
4+	Damage to the Hull

Hull (Abattoir)	
1–2	–
3–4	1 additional damage
5+	2 additional damage

Head / Bridge	
1	–1D6 to AF (Repair on 4+)
2	May receive an order only on a 4+ (Repair on 4+), 1 additional damage
3+	Damage to the Hull

Crystal	
1	–2 to AF in assault (Repair on 4+)
2	Total movement reduced by 5 cm (Repair on 4+)
3	Destroyed, total movement reduced by 5 cm
4+	Damage to the Hull

Portal (War Barge)	
1	Reduce to 4 the number of detachments that may cross the Portal
2	Reduce to 2 the number of detachments that may cross the Portal
3	Reduce to 1 the number of detachments that may cross the Portal, 1 additional damage
4+	Portal destroyed, Damage to the Hull

Reactor	
1	1 additional damage (from this damage, if the titan is destroyed it explodes)
2	1 additional damage
3+	Reactor severely damaged, 1D3 additional damage

Power Rings	
1	The Solar Flare can no longer fire (Repair on 4+)
2	Gains one fewer plasma token per turn (Repair on 4+)
3	Destroyed, gains one fewer plasma token per turn, 1 additional damage

10 Infantry

10.1 Cryptek

Even though they do not belong to the ranks of the nobility, they play an essential role in Necron affairs, for they maintain the strange machines of the Tomb Worlds. Each Cryptek is affiliated to a Conclave specialised in one aspect of their scientific arcana, but all can use incredible forces that less evolved races call “magic”: slowing time, driving minds to madness, or simply reducing armour to a heap of ashes. Unfortunately the Conclaves fight for prestige and to weaken the others. This behaviour leads Crypteks to fight among themselves during campaigns: in this way, not only can each Cryptek keep an eye on his rivals but also demonstrate the superiority of his own discipline at the heart of battle.

They have the **HQ**, **Attached Character**, **Psychic Save (4+)**, **Resurrection Orb**, and **Inorganic** abilities. He may use only one of his weapons per turn. In addition he may use one of his powers per turn.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	5+/6+f	+2	–	Eldritch Lance	60 cm	1	4+	–2
				Staff of Light	30 cm	2	4+	–2

10.2 Flayed Ones

The Flayed Ones were Necrons long ago, but they were the victims of the curse of one of the last C'tan, Llandu'gor the Flayer. The curse acts slowly and reveals itself only after millennia, so many Tomb Worlds are now affected. The Flayed Ones suffer from an unquenchable thirst for flesh and blood. They sometimes clothe themselves in scraps of flesh from their last victims in order to hide, a terrifying sight to behold. Incarnation of the madness awaiting every Pharaoh, the Necron nobility detests them — but recognises their usefulness in breaking enemy lines. Able to sense bloodthirsty opportunities better than any commander, the Flayed Ones are thus the first lines on the battlefield and withdraw into their secret cache only once their macabre feast is finished.

They have the **Infiltration**, **Fear**, **Reanimation Protocols (6+)**, **Inorganic**, and **Outcasts** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	5+	+3	–	Claws	–	–	–	–

10.3 Hexmark Destroyers

Hexmark Destroyers were once Deathmarks. Surging from their dimensional oubliettes like predators in ambush, these hunched monsters unleash fatal salvos upon the hostile. Moreover, their independent targeting optics and optimised firing patterns leave their prey no chance.

They have the **Reanimation Protocols (6+)** and **Inorganic** abilities. Their Enmitic Disintegrator **Reduces Cover (-3)**.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	5+	+2	–	Enmitic Disintegrator	20 cm	2	4+	0

10.4 Skorpekh Destroyers

Skorpekh Destroyers count among the most formidable melee killers of the Necron legions. Charging with their unsettling gait, their murderous limbs striking in a bloodstained whirlwind, Skorpekh Destroyers slake their need to kill as soon as they are loosed upon a battlefield. Nothing can override the compulsion to massacre that drives these deranged Necrons.

They have the **Reanimation Protocols (6+)**, **Damage (+1) in assault**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	5+	+6	–	Hyperphase Blade	–	–	–	–

10.5 Lychguard

They are still the guardians of the nobility, supposed incorruptible and dedicated to their task until death, but this became true according to their legend only once their transfer into a Necron body was complete. Lychguard have the same bodily envelope as the nobles and use deadly close-combat weapons, such as two-handed warscythes or hyperphase swords and dispersion shields.

They have the **Elite (2)**, **Dodge (5+)**, **Reanimation Protocols (6+)**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	4+	+5	–	Hyperphase Blade	–	–	–	–

10.6 Necron Warriors

They form the bulk of Tomb World armies. Numerous and heedless of danger, they bring their firepower thanks to their Gauss Flayers. Even if they are not among the best Necrons, their bodies allow them to suffer numerous wounds while continuing to function.

They have the **Reanimation Protocols (6+)** and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	5+	+1	–	Gauss Flayer	45 cm	1	5+	–1

10.7 Immortals

They earned their reputation during the campaigns against the Old Ones, and their transformation has given a new meaning to the expression “hardened veterans”. They have received better mechanical bodies than the Warriors and use Gauss Blasters thanks to their stronger arms, offering more firepower than the lighter versions. They have the **Reanimation Protocols (6+)** and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	5+	+2	–	Gauss Blaster	60 cm	2	5+	–1

10.8 Overlords

Overlords are the supreme leaders of Necron forces, directing the armies on the battlefield and ruling as absolute and cruel masters over their Tomb Worlds. Only one Overlord may be taken per Necron army.

The Overlord has the **Resurrection Orb**, **HQ**, **Attached Character**, **Elite (1)**, **Inorganic**, **My Will Be Done**, **Damage (+1) in assault**, and **Master Strategist** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	4+/5+f	+7	–	Ancient Staff of Light	45 cm	2	4+	–2

10.9 Pariahs

Pariahs, a rare Necron experiment, were created just before the Great Sleep, through the application of biotransference to non-Necrontyr slaves. Thanks to obedience protocols they fought alongside their masters, radiating a supernatural aura that greatly troubled their enemies. Their numbers diminish over time, for Pariahs are unable to self-repair like other Necrons. Each Pariah uses a unique combination of warscythes and energy weapons. They have the **Elite (1)**, **Inorganic**, **Reanimation Protocols (6+)**, **Psychic Abomination**, and **Soulless** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	5+	+4	–	Warscythes	45 cm	1	5+	–1

10.10 Triarch Praetorians

They are the lieutenants and heralds of the Necron kings, whose duty is to preserve the Necron dynasties, which is why they chose not to enter the stasis of the Great Sleep. Guardians of the Tomb Worlds and witnesses to what the galaxy has become, the Tyranid threat on Apotheosis forced them to awaken and unite the Necrons once more. The Praetorians choose the appropriate moment to strike, participating only if the fight merits it in their eyes. With the Rod of Covenant they carry, they can surely make the difference.

They have the **Elite (1)**, **Inorganic**, **Reanimation Protocols (6+)**, and **Jump Packs** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	5+	+4	–	Rod of Covenant	20 cm	1	4+	–2

10.11 Flayed Lords

The Flayed Ones are led into battle by their terrible chiefs, the Flayed Lords. Just as cruel and bloodthirsty as their subordinates, Flayed Lords are terrible fighters capable of eradicating an entire enemy squad with a backhand.

The Flayed Lord has the **HQ**, **Attached Character**, **Outcasts**, **Infiltration**, **Fear**, **Elite (1)**, **Resurrection Orb**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	4+/5+f	+5	–	Claws	–	–	–	–

10.12 Necron Lords

Coming from the ranks of the Nemessors and Pharaohs, they are the leaders of Necron forces and last heirs of the Necrontyr. They are filled with ambition, anger, and resentments. Perfect commanders, they strengthen nearby Necrons thanks to advanced equipment such as the Resurrection Orb. Necron Lords have numerous titles that indicate their rank in the nobility as well as the prestige of the Tomb World from which they originate. Some of them embrace the Destroyer cause and are then mounted on the same chassis as them.

They have the **HQ**, **Attached Character**, **Elite (1)**, **Inorganic**, **Resurrection Orb**, and **Leader** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	4+/5+f	+5	–	Staff of Light	30 cm	2	4+	–2

10.13 Deathmarks

Hunting their targets well before the battle, they were hunters and assassins before becoming Necrons, their mechanical bodies having perfected them, removing any need to sleep or breathe and granting them eternal vigilance and a cold and deadly precision. In other words, once hunted by Deathmarks, there is no way out.

They have the **Deep Strike (1)**, **Sniper**, **Inorganic**, **Deathmark**, and **Reanimation Protocols (6+)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	5+	+1	–	Synaptic Disintegrator	45 cm	1	4+	–1

10.14 Skorpekh Lords

Skorpekh Lords have diverged far from their initial condition as nobles, allowing the obsession with massacre to twist their minds and their bodies. Advancing hunched on three legs, their enmitic annihilators blast enemies to pieces while their claws and blades reap a scarlet harvest on the battlefield.

They have the **HQ**, **Attached Character**, **Elite (1)**, **Damage (+1) in assault**, **Resurrection Orb**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	4+/5+f	+7	–	Enmitic Annihilator	20 cm	2	4+	0

11 Cavalry

11.1 Destroyers

The only reason for the Destroyers' existence is to eliminate life. While other Necrons await the day they will be living again, the Destroyers have fully embraced their mechanical form, fusing their arms with their weapons for better accuracy and exchanging their legs for a hover platform to increase their mobility. Their Gauss Cannon and sophisticated targeting system sow destruction in their wake.

They have the **Antigrav**, **Reanimation Protocols (6+)**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	5+	+1	–	Gauss Cannon	45 cm	1	4+	–1

11.2 Heavy Destroyers

A more specialised version than their nihilist brothers, Heavy Destroyers will do whatever is necessary to defeat enemy armour, an objective they achieve thanks to their Heavy Gauss Cannon.

They have the **Antigrav**, **Reanimation Protocols (6+)**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	5+	+1	–	Heavy Gauss Cannon	60 cm	2	4+	–2

11.3 Canoptek Acanthrites

Canoptek Acanthrites are often encountered at the vanguard of Necron assault spearheads and extermination campaigns, and their numbers vary from a mere handful to vast hosts of these odious automatic locusts, capable of reducing a city to rubble and massacring its inhabitants in a pitiless tide of destruction.

They have the **Antigrav**, **Reanimation Protocols (6+)**, **Hard to Hit**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	5+	+3	–	Cutting Beam	20 cm	1	4+	–2

11.4 Destroyer Lords

Destroyer Lords are the leaders of Destroyer Phalanxes and owe obedience only to their fierce hatred of all sentient creatures. While Destroyers have ranged weapons of various types, Destroyer Lords reject them and have only a Staff of Light, for they want to see the fear in the eyes of the enemies they kill.

They have the **HQ**, **Attached Character**, **Elite (1)**, **Inorganic**, **Antigrav**, **Resurrection Orb**, and **Leader** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	4+/5+f	+5	–	Staff of Light	30 cm	2	4+	–2

11.5 Canoptek Spyders

Also known as Tomb Spyders, these are large spider-like robots charged with maintaining Necron complexes. The task would seem impossible without the help of Scarab swarms, small beetle-shaped robots that Canoptek Spyders can generate endlessly to assist them. In combat the Scarabs have another use, supporting other Necron units and engaging nearby enemies. There are two types of Canoptek Spyders, armed differently.

They have the **Antigrav**, **Reanimation Protocols (5+)**, **Scarab Generator**, and **Inorganic** abilities.

11.5.1 Assault

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	4+	+3	–	Claws	–	–	–	–

11.5.2 Support

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	4+	+1	–	Twin Particle Beamer	20 cm	1	4+	–2

11.6 Ophydian Destroyers

Repugnant to other Necrons, Ophydian Destroyers recall the servile Canoptek Wraiths and the infamous Flayed Ones because of their bodies optimised for murder. Able to make phased movements, they set ambushes to cut their prey to pieces.

They have the **Jump Packs**, **Deep Strike (2)**, **Hard to Hit**, **Reanimation Protocols (6+)**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	5+	+4	–	Hyperphase Blade	–	–	–	–

11.7 Tomb Blades

Tomb Blades count among the few units developed after the creation of the Necrons. This light antigrav is a small Necron jetbike fitted with Tesla weapons and an artificial intelligence to aid the weak reflexes of its Necron pilot. This gives a fast antigrav capable of great accelerations and very tight turns that no living creature could endure.

They have the **Antigrav**, **Hard to Hit**, **Infiltration**, **Reanimation Protocols (6+)**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	5+	+2	–	Twin Tesla Carbines	30 cm	2	4+	0

11.8 Canoptek Wraiths

Overflying the battlefield, Wraiths do not awaken like other Necrons, these ghostly creatures being in charge of Tomb World maintenance. They can phase partially or totally out of reality, an ability that allows them to repair complex mechanisms without being dismantled, which is a deadly advantage on a battlefield, their weapons passing through most known armours.

They have the **Jump Packs**, **Reanimation Protocols (6+)**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
25 cm	4+f	+4	–	Whip Coils	–	–	–	–

12 Walkers

12.1 Triarch Stalkers

Resembling gigantic arachnids, their multiple legs allow them to cover every type of terrain without having to slow like the clumsy walkers and tanks used by inferior races. The Stalkers have firepower that lets them negate enemy armour and are fast enough to withdraw before any reaction from the infantry.

They have the **Reanimation Protocols (6+)**, **Targeting Relay**, and **Inorganic** abilities. Their Heat Ray **Reduces Cover (-3)**.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	3+/6+f	+3	–	Heat Ray	45 cm	1	4+	–2

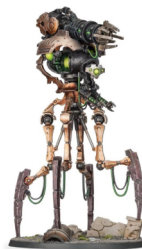

12.2 Canoptek Doomstalkers

Canoptek Doomstalkers advance with an unreal grace. Whether they pace the arsenals of their masters as tireless sentinels, or provide mobile fire support to Necron legions, the Doomstalkers annihilate whoever dares oppose them with the burning discharges of their doomsday blasters.

They have the **Reanimation Protocols (6+)**, **Reflex Fire**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	4+/5+f	+2	–	Doomsday Blaster	45 cm	1	3+	–2
				Gauss Blaster	45 cm	2	5+	0

12.3 Canoptek Reanimators

Forcing their way across the battlefield, Canoptek Reanimators are called to repair the damage inflicted on a Tomb World during an enemy attack. Their Gauss Atomisers emit nano-scarabs that can repair Necrons. Organic enemies have less luck, groaning in agony as they are atomically torn apart and recombined in a hideous and bloody manner.

They have the **Reanimator**, **Reanimation Protocols (6+)**, **Reflex Fire**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	4+/5+f	+2	–	Gauss Atomiser	45 cm	1	4+	–1

13 Vehicles

13.1 Doomsday Arks

Fitted with anti-infantry defence, the Doomsday Ark is not especially resilient. However, it perfectly embodies Necron battle philosophy (destroy the enemy before it has been able to do anything) thanks to its Doomsday Cannon, the most powerful weapon in the Necron arsenal except for legendary artefacts such as the Aeonic Orb. The Doomsday Ark has the **Inorganic** and **Antigrav** abilities. The Doomsday Cannon has the **Doomsday Cannon** ability; its Diffuse mode uses a Template (7.5 cm) and Concentrated mode has the **Damage (+1)** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	3+/5+f	+0	–	Doomsday Cannon – Diffuse	90 cm	Template	4+	–2
				Doomsday Cannon – Concentrated	90 cm	1	3+	–3
				Doomsday Cannon – Advance	75 cm	1	4+	–3

13.2 Ghost Arks

Ghost Arks do not merely transport Necron warriors. Although their firepower is particularly sought after, these antigrav vehicles also act as mobile repair platforms, further reinforcing the threat posed by an almost indestructible infantry.

Ghost Arks may transport only Necron Warriors or Immortals and have the **Inorganic**, **Antigrav**, **Transport (2)**, **Attached Transport**, and **Repair Platform** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
25 cm	3+/5+f	+0	–	Gauss Flayer Array	30 cm	1	4+	0

13.3 Tesseract Arks

It is one of the most powerful Necron machines, containing within it a singularity torn from the core of a dying star. The Tesseract Ark can manipulate this singularity to obtain various effects on the battlefield, including siphoning terribly destructive energies as a combat weapon.

The Tesseract Ark has the **Inorganic** and **Antigrav** abilities. The Singularity Chamber has two firing modes and may use only one per turn.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	3+/5+f	+0	–	Singularity Chamber – Concentrated	45 cm	1	3+	–3
				Singularity Chamber – Diffuse	45 cm	3	4+	0
				Tesla Cannon	45 cm	1	5+	0

13.4 Catacomb Command Barges

Catacomb Command Barges carry Necron commanders with the principal interest of bringing them to the heart of the fighting. The Necrons do not believe in delegating responsibility; an assault must be led personally not only to ensure that the battle plan unfolds well but also to impress political rivals. Command Barges allow both a clear view from a retractable assault ramp and the commander to join the melee if he so wishes.

The Catacomb Command Barge has the **HQ**, **Attached Character**, **Leader**, **Antigrav**, **Resurrection Orb**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	3+/5+f	+5	–	Tesla Cannon	45 cm	1	4+	–1

13.5 Annihilation Barges

Used in the depths of Tomb Worlds, Annihilation Barges are a weapon platform on an antigrav platform. Their primitive but specialised AI feels an intense thirst to kill. Annihilation Barges are particularly useful against large concentrations of forces and are the bane of Orks.

It has the **Inorganic** and **Antigrav** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	3+/5+f	+0	–	Tesla Destructors	45 cm	2	4+	–1
				Tesla Cannon	45 cm	1	5+	0

13.6 Doom Scythes

They generally take off from Necron spacecraft floating in low orbit, but they can also emerge from a complex hidden underground on the Tomb World. They are equipped with a wide variety of anti-infantry and anti-tank weapons, but neither missiles nor guns firing conventional shells, only pure energy. Needing neither ammunition and piloted by a tireless crew, Doom Scythes can patrol for very long periods.

They have the **Integral Armour**, **Dodge (5+)**, **Interceptor**, **Inorganic**, and **Flyer** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
–	3+/5+f	+5	–	Death Ray	20 cm	1	3+	–2
				Twin Tesla Destructor	30 cm	2	4+	–1

13.7 Night Scythes

Night Scythes resemble Doom Scythes closely enough, but their role is different. They replace part of their armament with an Invasion Beams device, allowing a Necron attack force to arrive in the midst of enemy troops from a dimensional pocket, an original Necron strategy to silence anti-aircraft batteries.

They have the **Integral Armour**, **Dodge (5+)**, **Inorganic**, **Interceptor**, **Invasion Beams**, and **Flyer** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
–	3+/5+f	+4	–	Twin Tesla Destructor	30 cm	2	4+	–1

13.8 Night Shrouds

The Night Shroud is a bomber far more imposing than the Night Scythes or Doom Scythes alongside which it operates. Its origins go back to the very ancient battles of the War in Heaven. The Night Shroud carries an antique relic called a Death Sphere containing vessels imprisoning antimatter, allowing it to carry out a bombardment.

It has the **Integral Armour**, **Inorganic**, and **Flyer** abilities, and its Death Spheres have the **Bombing (1)** and **Template (7.5 cm)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
–	3+/5+f	+2	–	Twin Tesla Destructor	30 cm	2	3+	–1
				Death Sphere	Bomb	Template	3+	–3

14 Knights

14.1 C'tan Shards

C'tan Shards are the remnants of the souls of the magical creatures that created the Necrons. Necron nobles release the Shards reluctantly and only in precise circumstances. A Shard remains under constant surveillance. Should it rebel, turn its attention elsewhere, or should the integrity of its necrodermis prison be compromised, it can be instantly teleported into a stasis chamber where it will languish for several centuries.

Each Shard has the **Containment Failure**, **Integral Armour**, **Psychic Save (2+)**, **Psyker**, **Antigrav**, **Wounds (4)**, **Terror**, **Inorganic**, and **Reinforced Necrodermis** abilities. The available Shards are described below.

14.2 Deceiver

The Deceiver is a master of the art of manipulation. He uses charm and subtlety to mask his words, which are a mixture of lies and half-truths. This gift was responsible for the loss of numerous planets, and the fall of great leaders of men. The Deceiver was surely responsible for the war between the Necrontyr and the Old Ones by fanning the hatred these servants felt.

It also has the **Dark Presence (-2, 20 cm)**, **Dread (0)**, **Redeployment (1D3)**, and **Damage (+1) in assault** abilities. The Deceiver may use 1 power among the C'tan Shard powers per turn.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
25 cm	2+/4+f	+11	–	Star-God Fists	–	–	–	–

14.3 Tesseract Vault

A Necron Tesseract Vault imprisons a Transcendent C'tan within its walls, in order to use its phenomenal powers as a weapon of mass destruction. The C'tan Shard is indeed able to reduce enemies to dust, set the battlefield ablaze, or trigger earthquakes with a simple gesture.

This Shard may use 2 powers per turn among the C'tan Shard powers.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	2+/4+f	+5	–	Tesla Sphere	45 cm	6	4+	0

14.4 Nightbringer

The Nightbringer is a sadistic god capable of pulverising the stars; he is death incarnate. He delights in inflicting pain and suffering, on the one hand to feed, but also simply because it is permitted to him. Death sits in the depths of his gaze, and his mighty scythe is guilty of the loss of entire civilisations. Having one day invested a spacecraft with part of his power, he destroyed an entire solar system and drank countless souls.

It also has the **Damage (+3) in assault** and **DR (5+)** abilities. The Nightbringer may use 1 power among the C'tan Shard powers per turn in addition to **Deadly Gas**.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
25 cm	2+/4+f	+11	–	Scythe of the Nightbringer	–	–	–	–

14.5 Transcendent C'tan

Transcendent C'tan are the most dangerous of their kind. Each of them is an aggregate of several shards, whether a dozen or a thousand of them, whose power far exceeds that of the sum of its components.

It also has the **World Pain**, **Damage (+1) in assault**, **Duellist**, **DR (4+)**, and **Parry** abilities. The Transcendent C'tan may use 1 power among the C'tan Shard powers per turn.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
25 cm	2+/4+f	+11	–	Crackling Tendrils	–	–	–	–

14.6 Void Dragon

Void Dragon Shards fill the air around them with a distorted and lashing sound. With a gesture they can unmake the war machines of inferior species, then draw the thus-disintegrated matter to themselves, like the gravitational well of a black hole, in order to reconstitute their constantly fluctuating physical envelope.

It also has the **Damage (+2) in assault** and **Absorption** abilities. The Void Dragon may use 1 power among the C'tan Shard powers per turn in addition to its **Voltaic Storm** power.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
25 cm	2+/4+f	+11	–	Spear of the Void Dragon	–	–	–	–

14.7 Tomb Golems

They resemble Necron warriors of an antique model and overfly the Necron hordes. Rarely present in Necron raids, they are more often encountered by unlucky explorers who discover a Tomb World. Their oversized weapons are not built like the lances of Imperial knights, having other uses besides the battlefield, probably related to Tomb World maintenance. However, their imposing and dreadful carcass advances slowly toward the enemy, leaving only desolation behind them. Tomb Golems are armed with the Eldritch Cannon, an enormous rifle delivering a short but powerful flaming shot.

The Tomb Golem has the **Wounds (2)**, **DR (6+)**, and **Inorganic** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	2+/3+f	+5	–	Eldritch Cannon	45 cm	2	4+	–2

15 Super-heavies

15.1 Canoptek Tomb Sentinels

Canoptek Tomb Stalkers and Canoptek Tomb Sentinels are enormous worm-like machines, using the same phasing technology as the Wraiths, but the similarities stop there. Their only role is to hunt and destroy invaders before they discover a buried necropolis. They travel underground even through the hardest layers of rock and strike as soon as they sense life. When a Tomb World is awakened, they remain a tool of choice for the Pharaoh to break enemy lines.

Canoptek Tomb Sentinels have the **Inorganic**, **Wounds (2)**, **Integral Armour**, **Damage (+1) in assault**, and **Deep Strike (2)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	2+/5+f	+7	–	Exile Cannon	20 cm	1	3+	–3

15.2 Monoliths

Monoliths are both the first and the most frightening signs of a Necron invasion. These enormous pyramid-shaped war machines are far more dangerous than they appear, for their Portal allows Necron legions to exit.

Monoliths have the **Inorganic**, **Wounds (2)**, **Integral Armour**, **Heavy Antigra**, **Portal (2 class 1 detachments)**, and **Deep Strike (1)** abilities. The Particle Whip, a Turret weapon, has two firing modes and may use only one per turn. The Gauss Flayers have the **Turret** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	2+/5+f	+4	–	Particle Whip – Concentrated	45 cm	1	3+	–3
				Particle Whip – Diffuse	45 cm	3	4+	0
				Gauss Flayer	20 cm	5	5+	0

15.3 Doomsday Monolith

This version of the Monolith is modified in depth, and is capable of focusing and emitting an enormous quantity of energy. These enormous pyramid-shaped war machines are far more dangerous than they appear, for their Portal allows Necron legions to exit.

Doomsday Monoliths have the **Inorganic**, **Wounds (3)**, **Integral Armour**, **Heavy Antigrav**, **Portal (2 class 1 detachments)**, and **Deep Strike (1)** abilities. The Fission Obliterator is on a Turret, uses a Template (12 cm), and **Reduces Cover** (−1). The Gauss Flayers have the **Turret** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	2+/5+f	+5	−	Fission Obliterator	75 cm	Template	4+	−1
				Gauss Flayer	20 cm	5	5+	0

15.4 Seraptek Heavy Constructs

Armed with formidable heavy weapons, the Seraptek can unleash energies capable of disintegrating both organic and mechanical matter. The rare people of the Imperium who have survived an encounter with a Seraptek have testified to its unnatural speed and agility. No one knows what this colossus of war was originally for, although few can deny the devastation it causes once on the battlefield.

It has the **DR (5+)**, **Wounds (2)**, and **Inorganic** abilities. Its weapons have the **Turret** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	2+/5+f	+7	−	Gauss Obliterator	75 cm	2	3+	−3
				Singularity Generator	30 cm	6	4+	0

15.5 Pylons

These large defence platforms are scattered across the galaxy and resemble abandoned ruins or remain buried underground until they are activated. When they are, the planet is already ready for the harvest, cut off from any outside help, the pylons being the ultimate anti-aircraft units, capable of bringing down even vessels in low orbit.

They have the **Inorganic**, **Wounds (2)**, **Integral Armour**, and **Deep Strike (1)** abilities. One firing mode must be chosen for its Particle Accelerator, which has the **Damage (+1)** ability, and the AA mode has the **AA** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
0 cm	3+/5+f	+5	–	Particle Accelerator – AA	100 cm	2	3+	–3
				Particle Accelerator – Ground	100 cm	2	3+	–3

15.6 Obelisks

Obelisks are strange constructions on a square base sharing the same crystal matrix as the Monoliths. The principal role of Obelisks is anti-aircraft defence. They create around them a zone of gravitic disturbance, making the passage of aircraft very dangerous; many crash in the vicinity of such constructions.

Obelisks have the **Heavy Antigra**, **Integral Armour**, **Wounds (3)**, **Inorganic**, **Anti-Gravitic Matrix**, and **Deep Strike (1)** abilities.

The Tesla Sphere is on a Turret.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	2+/5+f	+4	–	Tesla Sphere	45 cm	6	4+	0

16 Praetorians

16.1 Abattoirs

The Abattoir is a gigantic structure like a hill, moved onto worlds the Necrons have decided to “purify”. Dropped from low orbit, it resembles a floating pyramid with thousands of tentacles under its structure. The Abattoir is exceedingly rare, one of the few relics of the war against the Old Ones. An Abattoir in action is a terrifying thing, clawing the ground beneath it with its tentacles and firing energy rays at every living thing. An attack that must be resolved on the head/bridge is resolved on the crystal for the Abattoir.

The Abattoir has the **Wounds (9)**, **Terror**, **Agile**, **Inorganic**, **Integral Armour**, **Reinforced Necrodermis**, **Heavy Antigrav**, **Engine of Destruction**, **Organic Metal (3)**, **Damage (+1) in assault**, **Psychic Save (4+)**, **Deep Strike (2)**, and **4 Portal (1 class 1 to 2 detachment)** abilities.

Harvesters: the Harvesters may be used in two different ways:

- To shoot, in which case they have the **Turret** and **Reduces Cover (-3)** abilities.
- For assault, in which case each grants the **Parry** or **Entangle** ability, +2 AF, and **Damage (+1) in assault**. Each also increases the DR by 1.

Scarab Swarm: the Abattoir may fire 4 Scarab swarms per turn with the **Turret** and **Reduces Cover (-1)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	2+/5+f	+10	Sheet	4 Harvesters – Shooting	20 cm	4	4+	-1
				4 Harvesters – Assault	–	–	–	–
				4 Scarab Swarms	20 cm	3	5+	0

16.2 War Barges

The War Barge is very rare in Necron armies, used only during massive invasions of a world. The War Barge is a miracle of technology, able to teleport itself and carrying a large Portal, acting as an entry point for a complete Necron army. The existence of War Barges proves that no world is safe from a Necron invasion.

The War Barge has the **Wounds (5)**, **Agile**, **DR (5+)**, **Inorganic**, **Reinforced Necrodermis**, **Heavy Antigrav**, **Organic Metal (3)**, **Psychic Save (4+)**, **Deep Strike (1)**, **Dimensional Translocation**, and **Portal (5 class 1 to 3 detachments)** abilities. The Gauss Cannons have the **Turret** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	2+/5+f	+10	Sheet	Gauss Cannons	45 cm	6	4+	-1

16.3 Aeonic Orbs

The Aeonic Orb is so rare that its existence is only a rumour. Epitome of Necron technology, it is supposed to contain the power of a star in a confinement chamber, the structure being carried by an antigrav platform. A small opening in the field is enough to send a plasma ray annihilating everything in its path. Scholars can only speculate on the type of targets it was built to destroy.

An attack that must be resolved on the head/bridge is resolved on Fire Control for the Aeonic Orb.

The Aeonic Orb has the **DR (5+)**, **Wounds (6)**, **Agile**, **Inorganic**, **Reinforced Necrodermis**, **Integral Armour**, **Heavy Antigrav**, **Psychic Save (4+)**, **Engine of Destruction**, **Aeonic Orb**, and **Organic Metal (3)** abilities.

The Solar Burner **Reduces Cover** (−3). Solar Flare – Light Fire and Powerful Fire have the **Damage (+2)** and **Damages Buildings (AP −5/3)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	2+/5+f	+10	Sheet	Solar Flare – Burst (1 plasma token)	75 cm	2	3+	−4
				Solar Flare – Light (2 plasma tokens)	100 cm	1	2+	−5
				Solar Flare – Powerful (3 plasma tokens)	120 cm	2	2+	−5
				Solar Burner	45 cm	2	4+	−3

17 Titans

17.1 Tomb Guardians

Tomb Guardians resemble giant Canoptek Spyders armed with claws and a larger version of the particle projector. They are the war machines most frequently used by the Necrons. Activated when a necropolis is threatened by Gargants or enemies of Titan class, they remain active until the Tomb World is fully awakened, waiting for a Necron Lord to direct them.

The Tomb Guardian must choose two weapons when the list is created.

The Tomb Guardian has the **DR (5+)**, **Wounds (5)**, **Inorganic**, **Psychic Save (4+)**, **Damage (+1) in assault**, **Reinforced Necrodermis**, **Agile**, **Heavy Antigra**, and **Organic Metal (2)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
