2 History of the T'au

The xenos race known as the T'au, which inhabits a region of space near the Eastern Fringe of the galaxy, is young and expanding rapidly. Its weapons and technology are highly advanced. Although it is not yet two thousand years old, their nascent empire is spreading quickly through space and encountering the older races of the galaxy. This steady expansion has led to confrontations with the armies of the Imperium and those of other xenos races on many occasions, but strong in their advanced technology and driven by a common cause in which they place blind trust, the T'au extend their domain in the name of a Greater Good. This great idea sustains the T'au Empire: the individual must, in order to show a noble heart and to be just, set aside personal desires and work with others for the good of all. For the time being, this idea is respected by all. Compared with others, this empire is still limited and centred on a spherical cluster of stars, which allows the T'au to travel between them without resorting to Warp travel and the dangers that entails. Their domain includes several other xenos races that submitted of their own will or whose services were purchased through commercial agreements.

Unlike many xenos races encountered so far by Humanity, the T'au are not hostile, although they fiercely protect the territories they claim. The natural dynamism of the T'au drives them towards other occupied regions of the galaxy, which has inevitably created conflicts against humans as well as other peoples.

The T'au is humanoid in appearance, with two arms, two legs, and a single head, even though they have hooves in place of feet. Their skin is pale grey tending toward blue, although complexion and pigmentation can vary from one world to another; the inhabitants of Vior'la, for example, have much darker skin than natives of Bork'an. This tanned, dry epidermis is rough in texture, for it exudes practically no moisture. Smaller in stature than a human, the average T'au is slender, but their strength remains equivalent to that of an Imperial Guardsman, with a comparable tolerance for heat, cold, and pain. The face is flat at the level of the eyes, and it is thought that the spectrum of their visual field is slightly broader than that of a human in the infrared and ultraviolet. However, the absence of a pupil results in poor perception of distances and slower focusing. The T'au has no external olfactory organ; it is in fact located on the palate of the mouth, and at short range their sense of smell appears far more sensitive than that of a human. A T'au can therefore "taste" the air by guiding it with the tongue toward their sensory organs. Their life expectancy is generally shorter than that of a human, in particular those who have access to juvenats and other luxury medical treatments enjoyed by Imperial dignitaries, although a few rare individuals have found means of prolonging their lives well beyond the norm.

The appearance of a T'au reveals a great deal: caste, rank, home world, and status in society. The T'au commonly wears a single lock of hair adorned with ceremonial rings and trinkets that indicate rank and position, the most elaborate hair jewellery always denoting high responsibility. There are other, more specific ways of establishing a T'au's caste of origin: for example, Fire Caste warriors often bear deep scars, and it is not uncommon for the limbs of their leaders to be replaced by cybernetic implants. They most often come from the hot planets of their empire; their skin is usually darker than that of their kin and bears ritual tattoos and scarification. The artisans and labourers of the Earth Caste are stockier than other T'au, their hands more calloused, and they see life in a pragmatic way. This caste is less given to ornament, and few of these T'au indulge in any form of bodily decoration, which is considered frivolous and superfluous.

The Air Caste includes the pilots and messengers of the T'au, who spend most of their time in space. Their skin is generally paler and their bone structure lighter; some bones of their upper limbs are in fact hollow, which according to some of our scholars is a genetic remnant of a time when they were endowed with wings and could fly. When a member of the Air Caste is forced to remain on a planet's surface, they are extremely cautious in their movements, for long-term exposure to artificial gravity has reduced the resistance of the skeleton and made their bones fragile and brittle. The Water Caste is made up of merchants and diplomats, and it is generally the T'au of this caste who have travelled the most. Their features are softer and more expressive than those of the others. The respect these T'au have for other cultures makes them far more open to variety in dress and to the use of other dialects. It is thus common for a T'au merchant to prefer to negotiate while dressed in the same manner as their counterpart, and a diplomat often adopts the cultural manners of those with whom they deal when in their company. Of course, these practices always have an avowed purpose: the T'au way of life is never called into question and is held to be superior to all others.

The T'au of the last caste are the most mysterious. Their faces have the same typically flat features, but at the centre of their forehead stands a bony diamond. Its purpose, if it has one, remains an enigma, and despite several attempts the Inquisition has still been unable to recover the body of an Ethereal for thorough study. The gaps in knowledge of this more powerful and more important caste are a source of general consternation within the Ordo Xenos, and every scrap of information that can be gleaned is analysed with great attention.

Text from the Omnis Bibliotheca. More information at: <https://omnis-bibliotheca.com/index.php/Accueil>

3 Special Rules

3.1 Off-Table Artillery and Forward Observers

The T'au do not use Forward Observers. Instead, the T'au use their Markerlights to guide off-table fire. Off-Table Artillery may only target units that have a Markerlight token. Only one Off-Table Artillery shot may be attempted per Markerlight token per turn.

3.2 Drones

Drone formations are Limited Formations. You may take only two of them for each Company Formation in your army. In addition, you may not take more DX6 Remora Fighter formations than other Flyer formations.

3.3 Ethereal

3.3.1 Firestorm [Movement Phase]

Detachments from this codex of class 1 or 2 on a First Fire order within 12 cm of the Ethereal may reroll their missed To-Hit rolls.

3.3.2 Zephyr's Grace [Movement Phase]

Detachments from this codex of class 1 and 2 within 12 cm of the Ethereal gain a bonus of +5 cm to their total movement.

3.3.3 Tide Aura [Movement Phase]

Detachments from this codex of class 1 and 2 within 12 cm of the Ethereal gain a fixed 6+ save, or if they already have one, improve it by 1.

4 Special Abilities

4.1 Drone

Units with the Drone ability have the Inorganic ability and cannot capture objectives.

4.2 Markerlight (X cm)

Markerlights may be used in combination with another shooting activation. If you decide to do so, follow the procedure below. The entire detachment must use its Markerlights at the same time:

- For each base in the detachment with this ability, make a To-Hit roll of 3+ with a range of X cm, as for a standard shot.
- Repeat this procedure for every detachment using its Markerlight.
- If the shooting detachment can see the designated bases, for each successful hit the shooting detachment may gain a +1 To-Hit bonus on one of its attack dice, to be declared before those dice are rolled.
- If the shooting detachment cannot see the designated bases, it may fire using the Seeker Missiles rule.

The detachment with the Markerlights is not activated and may act later if it has not already done so, but it may not use its Markerlights more than once per turn. Markerlights do not grant a To-Hit bonus to weapons that use a template. If the target is a structure, the Markerlight is placed at its centre. Bases with this ability may use their weapons and their Markerlights at the same time. The Markerlight may be fired before the other weapons, which then benefit from any bonus.

4.3 Seeker Missiles

Seeker Missiles may be fired like any other normal weapon, and may also be fired at a detachment that has been marked by a Markerlight without needing Line of Sight to it.

4.4 Smart Missiles

Weapons with the Smart Missiles ability may target (with no deviation or penalty) bases out of the firer's Line of Sight that are visible to a base from this codex. This ability cannot be used during Intercept Fire.

4.5 Deflector Shield

When a Deflector Shield is hit by an enemy shot, it makes a 3+f save. If the save is passed, the shot has no effect. If the shield's save fails, the shield is destroyed and the hit is cancelled. Deflector Shields grant a Psychic Save (4+). They can be destroyed only by shots with an AP modifier of -1 or better.

4.6 Kroot

All Kroot bases gain +1 to their AF if they fight in forests or woods and cannot be transported. When a Kroot detachment has no Shaper within 12 cm, it acts instinctively and seeks cover. They may receive only Forced March orders and move towards the nearest forest. If there is no forest, they move towards the nearest cover instead. Once in cover they act normally but must remain there.

5 Psychic Powers

5.1 Tiger Shark

The Tiger Shark does not have to land to disembark its Drones and may drop Attack Drone bases at any point during its movement.

5.2 Shield Drones

When you purchase a Shield Drone support formation, you may attach each Drone to a detachment (except Flyers, Titans, and Praetorians), with a maximum of 4 Drones per detachment. This is done at deployment, before both armies are revealed. The cost of the Shield Drones is scored by the opponent as soon as they are purchased. When the detachment is hit by a shot, before the save, one Shield Drone is destroyed for each point of damage suffered. If there are not enough Drones to stop all the damage, the target is hit by the remaining damage. They do not function against lance attacks, which ignore shields, or against psychic attacks.

10 Infantry

10.1 Kroot Carnivores

The Kroot operate independently on the battlefield. They silently take position on the flanks, in dense forests or undergrowth if they have the opportunity. Once posted, they take careful aim at their targets and wait for the right moment to spring their ambush. When an ideal prey finally presents itself, they unleash a devastating volley. Once the enemy is disorganised and weakened, the Kroot burst from cover and launch themselves into the assault in a few agile bounds. The fighting that follows is invariably violent and bloody, for the Kroot are formidable opponents in close combat, undeniably more dangerous than most humans.

Kroot Carnivores have the **Infiltration**, **Camouflage**, and **Kroot** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	–	+2	7	Kroot Rifle	45 cm	1	5+	0

10.2 Kroot Hounds

As their name indicates, the Kroot Hound is a canine creature of the Kroot kind, which has evolved into a savage and agile attack beast, very fierce in combat and known for its bad temper. It is a highly intelligent dog, in a bestial way, and capable of understanding its masters' instructions. They are also very capricious, and it is not uncommon for a Hound to devour its master if the latter lets their attention slip. The Kroot charged with keeping the Kroot Hounds in line are often covered in scars, but they develop a close bond with their charges over time and act on the ground as one.

Kroot Hounds have the **Infiltration** and **Kroot** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	–	+2	7	Powerful Jaws	–	–	–	–

10.3 Pathfinders

Pathfinders are reconnaissance troops, and the eyes and ears of their Commanders, far more effectively than any Drone. The first role of Pathfinders is not to engage the enemy, but to optimise the effectiveness of the rest of the Cadre. Using specially adapted antigrav Devilfish or Tetras, Pathfinders operate as a vanguard in search of enemy forces. They keep a close watch on their adversaries while remaining skilfully hidden, and report details of their nature and disposition thanks to highly encrypted and almost undetectable communication systems. They have the **Infiltration** and **Markerlight (75 cm)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	–	–1	6	Pulse Carbine	30 cm	1	4+	0

10.4 Heavy Gun Drones

These Drones are equipped with heavy weapons instead of twin pulse carbines and are a little more imposing than normal Drones.

When you purchase a support formation of two Heavy Gun Drones, each becomes an Attached Character that you must join to another detachment. If you purchase a formation of four Drones, they form a normal detachment. Heavy Gun Drones have the **Drone** and **Jump Packs** abilities. Their weapons have the **Smart Missiles** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	6+	–2	–	Smart Missile	45 cm	1	4+	–1

10.5 MV1 Attack Drones

Drones are robotic weapon systems equipped with antigrav motors and governed by artificial intelligence. MV1 Attack Drones carry two twin pulse carbines and are used as mobile fire support for Fire Warrior detachments. When you purchase a support formation of two Attack Drones, each becomes an Attached Character that you must join to another detachment. If you purchase a formation of four Drones, they form a normal detachment. Attack Drones have the **Drone** and **Jump Packs** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	6+	–2	–	Pulse Carbines	20 cm	2	5+	0

10.6 MV71 Sniper Drones

When the first tests of the new Rail Rifle demonstrated its danger to the firer, the T'au tried to mount this weapon on a Drone chassis in order to preserve the lives of T'au warriors. The first tests of the new system proved the Drones' ineffectiveness at handling this weapon without assistance. The development of a control system greatly increased the system's effectiveness, giving birth to the MV71 Sniper Drones. A unit of MV71 Sniper Drones is composed of one Drone Controller base and two Sniper Drone bases.

The Drone Controller has the **Advanced Camouflage**, **Sniper**, and **Markerlight (60 cm)** abilities.

The MV71 Sniper Drones have the **Drone**, **Jump Packs**, **Sniper**, and **Advanced Camouflage** abilities.

10 cm	6+	–2	Attached	Pulse Rifle	75 cm	1	4+	0

10.7 Ethereal

The Ethereals form the ruling Caste of T'au society, and are born to counsel and guide their race along the path destined for it. They embody both the nobility and the clergy, and the deference shown to them is almost mystical. For important decisions, a wise Ethereal will listen to the elders of each Caste, although they remain sovereign in their choices. The Caste of Ethereals is bound to a precise role: to guide the other Castes so that they work together for the Greater Good. An Ethereal must be a consummate leader.

An Ethereal has the **HQ**, **Psyker**, **Attached Character**, and **Charismatic (12 cm)** abilities. An Ethereal may use one of its powers each turn.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	5+f	+1	Attached	Assault Weapons	–	–	–	–

10.8 XV15/XV25 Stealth Battlesuit

Stealth teams are special units that operate as “lone wolves” ahead of the army, with a certain degree of independence from the Cadre. They wage a secret war, infiltrating behind enemy lines in search of vulnerable targets. To reach enemy territory undetected, Stealth teams use camouflage technology based on light refraction, built into their Battlesuits. Auxiliary fields muffle sounds and mask them from thermal detectors, which allows them to go as far as possible into enemy territory in order to spring coordinated ambushes.

They have the **Jump Packs**, **Hard to Hit**, **Fire on the Move**, **Infiltration**, **Markerlight (60 cm)**, and **Advanced Camouflage** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	5+/6+f	+0	5	Burst Cannon	30 cm	2	4+	0

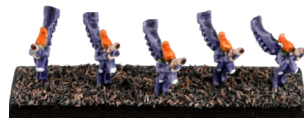

10.9 Vespids Stingwings

The piercing drone of a Vespids wings is a sound impossible to forget, even if few victims survive to describe such an experience. Indeed, that noise comes only seconds before the Neutron Blasters unleash devastating shots. The Vespids are an insectoid species that has joined the T'au Empire, and their mobile units, the famous Vespids Stingwings, serve as auxiliaries alongside the Fire Caste, and they are valued for their ability to cross broken terrain quickly. The Vespids excel in a role as a mobile reserve or flanking attack unit, although the T'au mainly use the communion helm provided to the Ka'Bri'Dan to coordinate their actions with those of the rest of the hunting group.

They have the **Jump Packs** and **Hard to Hit** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	–	+1	6	Neutron Blasters	20 cm	1	4+	0

10.10 Fire Warriors

To be born of the Fire Caste is to be born for war. Generations of selective breeding have made these T'au the strongest and most enduring. As soon as they can walk, these warriors-in-the-making enter the academies of the Fire Caste, institutions whose sole purpose is to provide soldiers to serve the expanding T'au Empire. Aspirants are rigorously prepared, mentally and physically, to become Fire Warriors, the professional infantry that forms the backbone of each Sept's Hunter Cadres. Most of these warriors are gathered into Strike Teams, the common and terribly effective core of a typical Sept army.

10.10.1 Fire Warriors Breacher

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	–	+0	6	Pulse Rifle	45 cm	1	4+	0

10.11 Gue'vesa

The Gue'vesa, literally “human helpers” in the T'au tongue, are human warriors who have made the cause of the Greater Good their own. These humans, often the descendants of troops captured or abandoned during the aborted Damocles Crusade, live and fight today alongside the T'au. For them, destiny has dictated that the Imperial Creed and the rule of Adeptus Terra be replaced by loyalty to the collectivist T'au empire and to the ruling Caste of Ethereals. Human auxiliary troops are a fairly common sight along the western fringes of T'au space, in particular on worlds contested during the Damocles Crusade. The T'au proved a more formidable enemy than expected for the Imperial forces and, when the offensive was halted, they were forced to withdraw in response to the far greater threat represented by the arrival of Hive Fleet Behemoth in neighbouring sectors.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	–	–1	7	Lasgun	45 cm	1	5+	0

10.12 Kroot Shaper

Kroot kindreds are commanded by mysterious beings called Shapers. Their task is to negotiate mercenary contracts and coordinate their strategies with those of their employers, and this prestigious position allows them to obtain more sophisticated equipment than that of their kin. Shapers who fight regularly alongside the T'au often carry Pulse Rifles instead of the primitive armament of the Carnivores they lead. But more importantly, they play a vital role within Kroot society that shapes the fate of the entire species, for Shapers are also responsible for the genetic development of their kind.

They have the **Infiltration**, **HQ**, and **Attached Character** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	5+	+3	Attached	Kroot Rifle	45 cm	1	5+	0

10.13 Fireblade

Fireblades are the most seasoned infantry of their cadre, and have declined the opportunity to don a Battlesuit because of their mastery of the art of fighting on foot. They are excellent leaders, whose great experience allows them to maximise the damage inflicted by their fire. Whether it is a matter of breaking the impetus of an Ork horde or bringing down the Space Marines of the Imperium through their thick armour, none knows the qualities of a Fire Warrior better than a Fireblade.

They have the **Elite (1)**, **HQ**, **Attached Character**, and **Markerlight (60 cm)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
10 cm	–	+1	Attached	Pulse Rifle	45 cm	2	4+	0

11 Cavalry

11.1 Piranha

The Piranha is a lightly armoured antigrav that serves as a firing platform that is both fast and manoeuvrable. Gifted with an excellent thrust-to-weight ratio and a high-performance antigrav motor, flown in tandem, the Piranha glides just above the surface of the ground, following the contours of the terrain closely to make the best use of cover. In addition to the main weapon mounted in its nose, the Piranha carries two Drones, which can remain docked to add their firepower, or detach to carry out some other mission in AI mode.

They have the **Antigrav** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	6+	+1	6	Burst Cannon	30 cm	2	4+	0

11.2 Tetra

The Tetra is a long-range, light, fast antigrav reconnaissance speeder, used by Pathfinders for infiltration and long-range reconnaissance missions. Pathfinder squads often operate well ahead of their cadre, using Tetras to get into position, then camouflaging their vehicles and operating on foot in complete discretion. Once the reconnaissance mission is complete, they return to their speeders and rejoin their own forces at full speed.

They have the **Antigrav**, **Infiltration**, and **Markerlight (90 cm)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	–	+0	6	Twin Pulse Rifles	45 cm	1	4+	0

12 Walkers

12.1 XV8 Crisis Battlesuits

The XV8 Crisis team is the most common T'au Battlesuit formation, for it crystallises the T'au approach to war: mobility, flexibility, and outrageous firepower. This kind of elite force often forms the spearhead of a Hunter Cadre; alternatively, it may be kept in reserve under the Commander's orders, in order to halt the enemy's advance, or to inflict a decisive blow that will break its resistance once and for all. Crisis teams generally consist of two to three warriors (who can sometimes act in isolation), trained and equipped to fulfil all kinds of functions in the field. For example, against large numbers, a Crisis team will favour Burst Cannons, for their rate of fire is optimal for scything down masses of light infantry. Against heavily armoured targets, Plasma Rifles are preferable for their ability to pierce ceramite, while the Fusion Blaster is the best anti-tank option. They have the **Jump Packs**, **Fire on the Move**, and **Elite (1)** abilities.

20 cm	4+/6+f	+1	5	Fusion Blasters	20 cm	2	3+	-2

12.2 Knarloc Rider

The Kroot are known for capturing and raising young Knarlocs to form elite mounted units. They mainly use their razor-sharp claws, their keen beaks, and the powerful muscles of their legs to tear their prey apart. The Kroot who ride them carry Kroot rifles to fire from advantageous positions where the Knarlocs can take them. Riding a Knarloc is also considered a social statement.

They have the **Infiltration** and **Kroot** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	—	+3	7	Kroot Rifle	45 cm	1	5+	0

12.3 XV9 Hazard Battlesuits

A new weapon in the arsenal of the T'au Empire, the XV9 “Hazard” Close Support Armour is a sophisticated and powerful Battlesuit that has aroused some controversy among the more traditionalist elements of the Earth Caste. Although it is without doubt powerful, its armament has a shorter range and is more complex than any that have preceded it, requiring the skills of a veteran to master it in combat. The XV9 itself demands an enormous expenditure of resources to be produced in useful numbers, resources which, according to some, would be better used elsewhere to build many examples of more proven models. The results obtained in service by the XV9 have converted many Fire Caste war leaders to its cause.

They have the **Jump Packs**, **Fire on the Move**, and **Elite (1)** abilities. The plasma flammers of the Mk I variant have the **Reduces Cover** (–3) ability.

20 cm	3+/5+f	+2	5	Ion Cannon	45 cm	3	4+	0

12.4 XV88 Broadside Battlesuits

The decision to combine the deadly Railgun technology of the Hammerhead tank with the versatility of the XV8 Crisis Battlesuit produced the XV88 Broadside. Designed to provide long-range support, XV88 Broadside teams have surpassed all expectations, becoming essential components of Hunter Cadres and anti-tank units of legendary reputation. Coupled with a powerful particle accelerator, the Railguns release projectiles capable of penetrating the strongest bunkers, or even passing straight through them. The weapon that equips the XV88 Broadside is certainly not as massive as the Railgun mounted on the Hammerhead, but it remains impressive in range and destructive power.

They have the **Reflex Fire** ability. The weapons of the Mk II variant have the **Smart Missiles** ability.

12.4.1 XV88 Broadside Mk I Battlesuit

12.5 Shas'vre

T'au commanders are accompanied by bodyguards named Shas'vre. Shas'vre are equipped with Crisis battlesuits and are considered Walkers.

They have the **Jump Packs**, **Fire on the Move**, and **Elite (1)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	4+/6+f	+2	4	Plasma Rifle	45 cm	1	4+	-1
				Missile Pod	45 cm	2	5+	-1

12.6 Shas'el

Battlesuit pilots who distinguish themselves on the battlefield may be promoted to commander. The ultimate trial to surpass the rank of Shas'el is to obtain repeated successes in combat. Shas'el use a Crisis battlesuit in combat and are considered Walkers.

They have the **Jump Packs**, **Fire on the Move**, **Elite (1)**, **Attached Character**, and **HQ** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	4+f	+3	Attached	Plasma Rifles	45 cm	2	4+	-1
				Missile Pod	45 cm	2	5+	-1

12.7 Shas'o

A Commander, or Shas'o in the T'au language, is the highest rank a Fire Warrior can obtain. This prestigious position can only be reached after years of service, climbing the ranks one by one — there is no alternative. To be Shas'o is to have shown a rare martial and tactical mastery, like a true disciple of the warrior arts.

They have the **Tactical Genius**, **Jump Packs**, **Attached Character**, **Fire on the Move**, **Elite (2)**, and **HQ** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	4+f	+4	Attached	Twin Plasma Rifles	45 cm	2	3+	-1
				Fusion Blasters	20 cm	2	3+	-2

12.8 Krootox

A salutary example of the evolutionary dead end of the Kroot, Krootox are peaceful massive herbivores, far more powerful than normal Kroot, born of kindreds that fed on the flesh of particularly muscular and barbarous beasts. These families locked themselves into a downward spiral of evolution, losing their intelligence and with it their ability to forge their own genetic future. The result is an extremely muscular and oversized variant of Kroot physiology, whose mind can scarcely display anything but unreasonable brutality. Were it not for the fact that the Kroot found a use for the Krootox, the lineage might have died out generations ago, but instead they are commonly observed among Carnivore kindreds in the T'au Empire and elsewhere.

They have the **Infiltration** and **Kroot** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	5+	+4	7	Kroot Gun	60 cm	2	5+	-1

12.9 XV95 Ghostkeel Battlesuits

Huge, deadly, and almost impossible to detect until it attacks, the XV95 Ghostkeel ranks among the most effective terror weapons in the galaxy. These Battlesuits are several times the size of a Fire Warrior, and are fitted with a set of repulsion motors as well as effective weapons, not to mention multiple support systems, high-technology devices, and a veritable arsenal of electronic warfare. Ghostkeel Battlesuits can shred armoured squadrons and massacre infantry formations by springing deadly ambushes. The storm of fire they then unleash is such that the enemy has the impression of being attacked by an entire army bursting from an unexpected direction.

They have the **Fire on the Move**, **Infiltration**, **Advanced Camouflage**, and **Elite (1)** abilities.

20 cm	4+/6+f	+1	5	Cyclic Ion Raker	30 cm	1	4+	-1
				Fusion Blasters	20 cm	2	3+	-2

13 Vehicles

13.1 AX3 Razorshark Fighter

For Fire Warriors on the front line, few sights are more comforting than the arrival of a Razorshark Fighter bursting from the cloud ceiling and diving toward enemy formations. Its chassis has many elements in common with that of the Sun Shark Bomber, except that the Razorshark forgoes interceptor Drones in favour of additional manoeuvre engines, and exchanges the Pulse Bomb Generator for a formidable quad ion turret. The latter is a terrible weapon against light vehicles, which it promptly turns into twisted wrecks. At the cost of slight instability, the quad ion turret can also fire in overload mode, and thus affect an area sufficient to consume entire squads in a single blast.

The Razorshark has the **Integral Armour**, **Interceptor**, **Jink (5+)**, and **Flyer** abilities. Its Ion Cannons have the **Turret** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
–	3+	+3	6	Quad Ion Cannons	30 cm	2	3+	–1
				Burst Cannons	20 cm	2	4+	0

13.2 AX39 Sun Shark Bomber

Their combat doctrines resting on mobility, Hunter Cadres do not employ artillery in the conventional sense. Instead, in collaboration with the Air Caste, they have developed the Sun Shark Bomber, an elegant atmospheric aircraft capable of plunging from the skies to strike ground targets with its devastating armament. Sun Sharks are therefore the alpha predators of the skies in which they operate. The mere sight of a formation of such bombers, arriving in graceful flight over the battlefield while leaving behind a carpet of bluish explosions, is enough to plunge the enemies of the T'au Empire into indescribable terror.

It has the **Integral Armour** and **Flyer** abilities. Its bombs have the **Bombardment (1)** and **Template (7.5 cm)** abilities. Its missiles have the **Smart Missiles** ability.

13.3 Barracuda

The Barracuda air-superiority fighter is the most common atmospheric aircraft of the T'au. Faster than the Marauder Bomber of the Imperial Navy, but without the top speed of the Thunderbolt or Lightning Fighter, it compensates through its sophisticated electronic systems and the natural talents of its pilots. In aerial combat, Thunderbolts and Barracudas are very close, the Thunderbolt being the faster and the Barracuda the more manoeuvrable. Imperial pilots often have combat experience that the T'au Air Caste struggles to match. The Barracuda has the **Integral Armour**, **Jink (5+)**, **Interceptor**, and **Flyer** abilities. Its Burst Cannons have the **Turret** ability.

				Burst Cannons	20 cm	2	4+	0

13.4 DX6 Remora Fighter Drone

The DX6 Remora Fighter is a stealth combat aircraft commanded by a drone armed with two twin burst cannons, perfect for striking lightly armoured units.

The Remora has the **Integral Armour**, **Camouflage**, **Markerlight (45 cm)**, **Flyer**, and **Drone** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	5+	–1	–	Twin Burst Cannons	20 cm	2	4+	–1

13.5 Devilfish

The armoured Devilfish troop transport is the workhorse of all T'au ground forces, and provides Fire Caste infantry with precious mobility as well as a valuable fire-support unit in all circumstances. A Devilfish can carry up to twelve Fire Caste warriors with their full kit, and take them into combat in relative safety, then provide mobile support once they have disembarked. Highly mechanised cadres rely on Devilfish to move their troops quickly in order to redeploy their firing line to the most crucial place and support Hammerhead tanks.

The Devilfish has the **Antigrav**, **Attached Transport**, and **Transport (2)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
25 cm	3+	+0	Attached	Burst Cannon	30 cm	1	4+	0

13.6 Interceptor Drones

Interceptor Drones are flying drones equipped with heavy anti-aircraft weapons.

Interceptor Drones have the **Integral Armour**, **Drone**, **Attached Character**, **Shield Drone**, and **Flyer** abilities. They may only be attached to Flyers.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP

13.7 Sentry Drone

A Sentry Drone Turret is a group of automatic weapon systems linked together to form a defensive perimeter. Sentry Drone Turrets are deployed from orbit or from very high-altitude vessels and have a small jump reactor to reach their position. Once in place, the turrets remain stationary until they are recovered.

Sentry Drone Turrets have the **Autonomous Defence**, **Turret**, **Integral Armour**, **Drone**, and **Deep Strike (2)** abilities.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
0 cm	5+	–2	–	Burst Cannons	30 cm	2	4+	0

13.8 Hammerhead

The T'au main battle tank evokes contained violence and bears the name “Hammerhead”. Like a starving predator on the prowl, all enemies who have had dealings with it have quickly learned to fear its firepower. First encountered by the Imperium during the Damocles Crusade, the Hammerhead has since been the basic combat vehicle of T'au Cadres, although alternative armaments have since been successfully identified. Hammerhead tanks are commonly encountered in small numbers, to support Fire Warrior teams.

Hammerheads have the **Antigrav** ability. Their main weapon has the **Turret** ability; in addition the Railgun of the Mk II variant has the **Damage (+1)** ability, and the Missile Rack of the Mk III uses **Artillery** and **Reduces Cover** (–1). Finally the missiles of the Mk II, IV, and VI variants have the **Smart Missiles** ability.

13.9 Sky Ray

The Sky Ray missile tank is a specialised variant of the Hammerhead whose turret cannon is replaced by a rack of formidable guided missiles. Originally designed to neutralise enemy aircraft, the Sky Ray has also proved itself against ground targets. In the field, the Sky Ray is an antigrav tank that floats at the rear of the front, sweeping the horizon with its two Markerlights in search of a ground or aerial target to lock.

The Sky Ray has the **Antigrav**, **Markerlight (75 cm)**, and **Seeker Missiles** abilities. Its weapon has the **AA** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
20 cm	3+	+0	6	Seeker Missiles	75 cm	2	4+	-2

13.10 Stingray

After the Damocles Gulf Crusade, the T'au encounter with old Imperial forces led them to consider developing a weapon that could fire outside and beyond lines of sight to break the waves of Orks unleashed in the sector after the Imperium/T'au ceasefire. A large unique warhead, similar to that used by Earthshaker Cannons, was first envisaged, but the T'au quickly realised it would be less effective than a modified seeker missile, with a large number of smart missiles loaded in the hold. The result was first a tank based on the Sky Ray chassis. Early field trials were promising, but revealed shortcomings in the vehicles used for the test. The first of these was the size of the new missile, which made the tanks extremely dependent on resupply during prolonged battles.

The Stingray has the **Antigrav** and **Seeker Missiles** abilities. The Submunition Missiles use a **Template (7.5 cm)** that **Reduces Cover (-1)** and have the **Battery** ability; the Smart Missiles have the **Smart Missiles** ability.

14 Knights

14.1 XV104 Riptide Battlesuit

The XV104 Riptide is a marvel of the Earth Caste, a heavy Battlesuit capable of annihilating tanks, infantry formations, and fortified positions while dodging or withstanding enemy fire. The Riptide is twice as tall as an XV8 Crisis Battlesuit, but its ease of movement is closer to the latter than to Imperial walkers of a comparable size. Although the Riptide is enormous and fitted with various support systems and weapons, it remains a Battlesuit. Indeed, it is piloted by only a single warrior, who is nonetheless able to unleash precise fire and move with incredible tactical efficiency.

It has the **Wounds (2)**, **Integral Armour**, **Jump Packs**, **Fire on the Move**, and **Reflex Fire** abilities. Its missiles have the **Smart Missiles** ability.

				Smart Missiles	45 cm	2	4+	-1

14.2 KV128 Stormsurge Battlesuit

KV128 Stormsurges are colossi of destruction able to annihilate tank columns or defeat super-heavy walkers with a single salvo. Sent to the front of the war against the Imperium, which continues to grow, these mobile bastions have quickly proved their usefulness against infantry hordes and the enemy's armoured masses. Although slow, a single Stormsurge can reverse the course of a battle in a few seconds thanks to its phenomenal firepower. The Stormsurge is the first of a new series of war machines called ballistic suits. Developed by the famous Earth Caste scientist Fio'o Bork'an Ishu'ron, this enormous bipedal firing platform is a response to the enemy's super-heavy war machines.

It has the **Wounds (3)** and **Reflex Fire** abilities. A Stormsurge may fire a maximum of 4 Cluster Rockets, which have the **Seeker Missiles** and **Limited Munitions (4)** abilities. Its Pulse Driver Cannon has the **Damage (+1)** ability. Its Destroyer Missile has the **Seeker Missiles** ability. Finally it possesses a Smart Missile system.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP

14.3 XV107 R'varna Battlesuit

A development of the Riptide Battlesuit, the T'au XV107 R'varna Battlesuit sacrifices mobility in favour of heavier armour and increased firepower in the form of two Pulse Cannons, experimental weapon systems that fire projectiles capable of saturating the target area in a deadly storm of plasma pulses. The stoic Earth Caste of Ke'lshan was almost forced to abandon its plans for developing the R'varna Battlesuit because of the monumental cost of these new engines of war.

It has the **Wounds (2)** and **Fire on the Move** abilities, and its weapon uses a **Template (7.5 cm)** that **Reduces Cover (-1)**.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
15 cm	3+/4+f	+3	5	Submunition Cannons	75 cm	Template	4+	-1

14.4 XV109 Y'vakra Battlesuit

Hastily deployed after the success of the R'vakra Battlesuit, the XV109 Y'vakra is a class 10 Battlesuit designed for devastating shock attacks. To facilitate this role, the Y'vakra is equipped with a triple Plasma Cannon capable of vaporising the hardest ceramite, and an electromagnetic pulse cannon designed to disable enemy war machines. The complex network of vectored thrusters built into the Y'vakra's impressive armour allows it to cross the battlefield gracefully, striking the greatest concentration of enemies and taking a heavy toll in lives before flying off.

It has the **Wounds (2)**, **Jump Packs**, **Fire on the Move**, and **Reflex Fire** abilities. Its flamer uses a **Flame Template** that **Reduces Cover** (−3).

15 Super-heavies

15.1 AX1-0 Tiger Shark

The Tiger Shark is the Barracuda's larger cousin. It is an enormous aircraft deployed in the role of fighter-bomber. Tiger Sharks are never as numerous as Barracudas, but they have many characteristics and systems in common with them. All crew members come from the Air Caste, which gives them the natural advantage of a superior three-dimensional awareness and a tolerance for higher acceleration speeds, and more G in the turn, than a human pilot. Just like the Barracuda, the different Air Castes of the Septs operate according to slightly different versions.

The Tiger Shark has the **Wounds (2)**, **Integral Armour**, and **Flyer** abilities. Its Ion Cannons have **Damage (+1)**. Its Burst Cannons have the **Turret** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
–	3+	+3	5	Heavy Ion Cannons	45 cm	2	4+	–3
				Burst Cannons	20 cm	4	4+	0

15.2 Scorpionfish

After facing Imperial super-heavy tanks during the Damocles Crusade and the conflicts that followed, the T'au devoted considerable effort to developing their own super-heavy tanks. Having no other vehicle large enough to serve as a base, the Orca transport was heavily armed and armoured, reducing its mobility so much that it became a surface antigrav. This variant was called the Scorpionfish Heavy Missile Tank and carries no less than a complete set of submunition, seeker, and tracer missiles as well as a direct-fire missile launcher. It does not have a single main weapon but rather acts as a platform for many smaller systems, making it capable of attacking any kind of target. This flexibility has proved a considerable asset in recent T'au campaigns. It forms part of the rear firing line of T'au armies, protecting the rear lines as solidly as a rock.

The Scorpionfish has the **Heavy Antigrav**, **Wounds (2)**, and **Markerlight (75 cm)** abilities. It possesses a Smart Missile system. Its Heavy Missile Launcher has three firing modes which all use **Seeker Missiles**. The Submunition mode uses a **Template (12 cm)** that **Reduces Cover (–1)**.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP

				Seeker Missiles	100 cm	6	4+	–1

15.3 Tiger Shark Drone Transport

The Tiger Shark plays both the role of a Drone transport and a heavy support fighter. Its lower hold can transport 4 Attack Drone bases, which can be dropped at altitude to reinforce T'au lines or to launch surprise attacks behind enemy lines. The Tiger Shark does not have to land to disembark its Drones and may drop Attack Drone bases at any point during its movement.

The Tiger Shark has the **Wounds (2)**, **Integral Armour**, **Flyer**, **Tiger Shark**, and **Transport (4 Drones)** abilities. Its Burst Cannons have the **Turret** ability.

–	3+	+1	5	Ion Cannons	30 cm	2	4+	–2
				Burst Cannons	20 cm	4	4+	0

15.4 Orca Transport

The Orca is an orbital transport vehicle specially designed to carry troops, equipment, and supplies from spacecraft in orbit to a planet's surface. Unlike the Thunderhawk gunship of the Space Marines or the much larger T'au Manta, the Orca is not a front-line combat vehicle, armed and armoured to take part in a battle.

The Orca is equipped only for self-defence. Its primary function is transport. The Orca has the **Integral Armour**, **Wounds (2)**, **Transport (8)**, and **Flyer** abilities. Its Burst Cannons have the **Turret** ability.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP
30 cm	3+	+1	5	Burst Cannons	20 cm	4	4+	0
				Smart Missiles	30 cm	2	4+	–1

15.5 Swordfish

Another result of T'au work in the design of super-heavy vehicles, the Swordfish super-heavy tank is the T'au answer to Imperial Shadowswords and Baneblades. Even if they had not initially intended to use super-heavy vehicles (except the Manta), the T'au quickly realised the effectiveness of Imperial super-heavies and rapidly developed their own. The first to be built was the Scorpionfish and shortly after came the Swordfish.

The Swordfish has the **Heavy Antigrav** and **Wounds (2)** abilities. Its Heavy Railgun has the **Turret** and **Damage (+1)** abilities. Finally, it possesses a Smart Missile system.

Movemen	Save	AF	Morale	Weapon	Range	Dice	To-Hit	AP

				Smart Missiles	45 cm	2	4+	-1
				Burst Cannons	30 cm	2	4+	0

16 Praetorians

16.1 Moray

The Moray is a unit recently introduced into T'au armies in order to meet the need for heavy fire support without having to deploy a Manta missile ship. The Moray is quite similar to the Manta in appearance, but is much smaller and cannot transport troops, while remaining a substantial striking force. Its main weapon is either a heavy Railgun, a more powerful version of the Railgun mounted on T'au tanks, or a battery of heavy ion cannons firing in unison. It is a mix between a heavy high-altitude antigrav and a slow aircraft, just like the larger Manta missile ship, and can be considered the T'au answer to enemy super-heavy tanks and reconnaissance Titans.

A Moray has the **Floating**, **Wounds (6)**, **DR (5+)**, and **Deflector Shields (2)** abilities. It is equipped with Burst Cannons in a turret and Tracer Missiles that have the **Seeker Missiles** ability. The variant with a Railgun has two firing modes. The first is a powerful shot with **Damage (+2)**. The second is a submunition shell that uses a **Template (12 cm)** and **Damages Buildings (AP -4/2)**.

				Twin Burst Cannons	30 cm	6	4+	-1
				Tracer Missiles	100 cm	2	4+	-3

16.2 Manta

The Manta is the T'au super-heavy vessel. It is so large that it is in fact a small spacecraft. The Manta is the closest thing to the Titans of the Imperium or the Gargants of the Orks, with comparable firepower. It is well armed and armoured for front-line use, where it is intended to deploy and fight as an attack ship. A Manta has formidable firepower. Its main weapons are two Heavy Railguns, which fire a fin-stabilised shell for greater lift in the atmosphere.

The Manta has the **Floating**, **Wounds (8)**, **DR (5+)**, **Deflector Shields (3)**, and **Transport (24)** abilities. It is equipped with Burst Cannons in a turret. Its Railgun has two firing modes. The first is a powerful shot with **Damage (+2)**. The second is a submunition shell that uses a **Template (12 cm)** and **Damages Buildings (AP -4/2)**. Finally, its Tracer Missiles have the **Seeker Missiles** ability.

17 Titans

17.1 KX139 Ta'unar Supremacy Armour

The T'au "Supremacy" Battlesuit is larger than any other current class of Battlesuit. It is intended to face a threat that the T'au Empire had not yet known: the defence of worlds belonging to their growing domain against the counter-expansion forces of other races. Lacking the manoeuvrability of other Battlesuits, the KX139 Ta'unar Supremacy Armour was designed for static defence, with massively destructive long-range weapons.

Faced with a growing number of enemy heavy assault elements, from Imperial Knights to the alien monstrosities of Tyranid Hive Fleets, T'au pilots were often outclassed. The Earth Caste engineer Fio'o Ke'lshan Sho'aun developed the KX139 to put in place a dynamic but stoic defence against such enemies.

The Ta'unar is equipped with two arm weapons and has the **Wounds (4)**, **DR (5+)**, **Fire on the Move**, **Agile**, and **Deflector Shields (2)** abilities. In addition, it possesses a Smart Missile system.

18 Heavy Artillery

18.1 Off-Table Artillery

It may represent long-range weapon batteries deployed well away from the combat zone or artillery fire coming from vessels in orbit. Off-Table Artillery has a cost in Destruction Points rather than army points. Usually launched from orbit by T'au cruisers, T'au Off-Table Artillery is guided by Markerlights. Even if these shots are not called by Forward Observers, you must pass a communication test of 3+ in order to use Off-Table Artillery. Only one Off-Table Artillery shot may be used on the point concerned, even if the communication test is failed. Gravitic tracer missiles are launched from gravitic launchers and inflict enormous damage on impact with the target. Gravitic submunition missiles are used by the T'au to suppress heavily entrenched enemy forces.

Gravitic Missiles follow the **Seeker Missiles** rules and **Damage (+1)**.

Submunition Missiles have the **Damages Buildings (AP -4/2)**, **Seeker Missiles**, **Template (12 cm)**, and **Reduces Cover (-1)** abilities.
